 DUMP/ANALYZE 00000012  
 LAST PATCHED 11/21/73 00000013

SEVERAL OPTIONS ARE AVAILABLE FOR CONTROLLING THE ANALYSIS  
 OF A MEMORY DUMP. THEY MAY BE CLASSIFIED INTO FOUR CATEGORIES:

I. THOSE WHICH SPECIFY THE FORMAT OF THE PRINTOUT OF MEMORY:  
 SPLASH DUMP, OCTAL DUMP, ALPHA/OCTAL DUMP, OR ALPHA DUMP;  
 EITHER SINGLY OR DOUBLY SPACED.

II. THOSE WHICH INCLUDE OR EXCLUDE AREAS OF MEMORY NOT OTHERWISE  
 INCLUDED OR EXCLUDED:

1. INCLUSION OF AVAILABLE AREAS. 00000080
2. EXCLUSION OF: 00000110
  - A. MCP CODE AREAS. 00000120
  - B. NORMAL STATE CODE AREAS. 00000130
  - C. NORMAL STATE AREAS OTHER THAN THOSE RELATING TO ONE  
 SPECIFIC MIX INDEX WHERE THE MIX INDEX IS SPECIFIED BY THE USER. 00000140
  - D. ENTIRE CONTENTS OF MEMORY 00000155

III. THOSE WHICH CAUSE OMISSION OF CERTAIN SECTIONS OF ANALYSIS:

1. OMISSION OF THE PRINTOUT OF MCP PRT IDENTIFIERS, SORTED  
 ALPHABETICALLY AND BY PRT LOCATION. 00000170

IV. THOSE WHICH CONTROL THE DUMPING OF STACKS:

1. EXCLUSION OF ALL NORMAL STATE STACKS EXCEPTING THE ONE  
 BELONGING TO THE SAME MIX INDEX AS THE ONE SPECIFIED BY THE USER. 00000220
2. INCLUSION OF A USER SELECTED "STACK" AREA WHICH THE  
 ANALYZER WOULD BE UNABLE TO LOCATE WITHOUT THE USER'S ASSISTANCE. 00000240

THE MAJORITY OF OPTIONS MAY BE SET USING A COMMON CONTROL  
 CARD; A FEW MAY BE SET ONLY VIA THE "IN" MESSAGE TO ALTER THE  
 CONTENTS OF CERTAIN PRT CELLS WHICH HAVE BEEN RESERVED FOR  
 CONTROL FUNCTIONS.

THE COMMON CONTROL CARD IS ASSUMED TO CONTAIN AN EIGHT DIGIT  
 NUMBER--IF LESS THAN EIGHT APPEAR, LEADING ZEROES ARE  
 AUTOMATICALLY SUPPLIED. THE ANALYZER SEPARATES THE 3 DIGITS INTO  
 TWO GROUPS:

- A. THE 5 LEFT-MOST DIGITS ARE EXPECTED TO BE \*OCTAL\* DIGITS  
 WHICH REPRESENT THE TOP-OF-STACK ADDRESS OF THE USER SPECIFIED  
 "STACK" AREA. IF ANY DIGIT EXCEEDS "7" OR IF ALL FIVE ARE "0",  
 ONLY STACKS LOCATED BY THE ANALYZER WILL BE DUMPED. OTHERWISE,  
 ONE ADDITIONAL "STACK", PROVIDING IT ALREADY HAS NOT BEEN DUMPED,  
 WILL BE DUMPED STARTING AT THIS ADDRESS AND CONTINUING UNTIL  
 200(DECIMAL) WORDS BELOW IT HAVE BEEN PRINTED( THE STACK IS  
 ASSUMED TO BE A CONTROL STATE STACK FOR PURPOSES OF STACK  
 ANALYSIS). SHOULD MORE OR LESS STACK BE DESIRED, THE AMOUNT  
 ( IN DECIMAL) OF STACK TO ANALYZE CAN BE ENTERED INTO PRT CELL  
 27(OCTAL) USING THE "IN" MESSAGE.  
 IN MOST CASES, THE TOP-OF-STACK VALUE USED MAY BE THE SETTING

00000340  
 00000350  
 00000360  
 00000370  
 00000380  
 00000390  
 00000400  
 00000410  
 00000420  
 00000430  
 00000435  
 00000440

OF THE "S" REGISTER TAKEN FROM THE DISPLAY PANEL AT THE TIME  
OF THE HANG. IF NO TOP-OF-STACK IS SPECIFIED THE ANALYZER WILL OBTAIN  
ONE FROM THE CONTROL STATE MSCW LOCATED IN CELL 7. THE STACK  
OBTAINED IN THIS MANNER IS GENERALLY OF INTEREST, ESPECIALLY WHEN  
LINKS HAVE BEEN CLOBBERED.

00000445  
00000450  
00000451  
00000452  
00000453  
00000455

B. THE RIGHT-MOST 3 DIGITS ARE INTERPRETED AS DECIMAL DIGITS  
AND SERVE TO SET THE MAJORITY OF ANALYZER OPTIONS. GENERALLY  
SPEAKING, THESE OPTIONS ARE INTEGRAL POWERS OF 2, ARE INDEPENDENT  
OF ONE ANOTHER AND MAY THEREFORE BE USED ADDITIVELY. THAT IS,  
THE COMBINED FUNCTIONS OF COMMON VALUES 2, 16, 32, AND 64  
COULD BE INVOKED BY "COMMON=114"(2+16+32+64). THE EXCEPTIONS  
TO THIS RULE WILL BE ELABORATED AFTER EACH COMMON OPTION IS  
DESCRIBED IN DETAIL.

00000460  
00000470  
00000480  
00000490  
00000500  
00000510  
00000520  
00000530

COMMON CARD OPTIONS

NOTE: IN THE DESCRIPTION OF EACH OPTION, IT IS ASSUMED THAT A  
STANDARD MEMORY DUMP ANALYSIS IS OBTAINED \*EXCEPT\* FOR THE  
DIFFERENCES GENERATED BY THAT PARTICULAR OPTION. A "STANDARD"  
ANALYSIS IS ONE OBTAINED WITH NO COMMON VALUE(I. E. COMMON=0).

00000540  
00000550  
00000560  
00000570  
00000580  
00000590  
00000600

COMMON=0.  
YIELDS A STANDARD ANALYSIS. AN MCP/PRT FILE IS REQUIRED.

00000610  
00000620  
00000625

COMMON=1.  
YIELDS A "SPASH", UNANALYZED DUMP OF MEMORY, NO MCP/PRT IS  
REQUIRED. A "COMMENT" ENTERED WHEN THE DUMP TAPE WAS CREATED  
IS ALSO PRINTED.

00000630  
00000640  
00000650

COMMON=2.  
DUMPS ALL AVAILABLE AREAS.

00000660  
00000665  
00000670

COMMON=4.  
EXCLUDES ALL NORMAL STATE OBJECT CODE.  
THIS INCLUDES ALL PROGRAM SEGMENTS ASSOCIATED WITH A  
MIX INDEX AND ALL INTRINSIC SEGMENTS.

00000680  
00000765  
00000770  
00000780  
00000790  
00000800

COMMON=8.  
EXCLUDES ALL MCP OBJECT CODE.

00000815  
00000820  
00000830

COMMON=16.  
CAUSES CERTAIN ARRAYS SELECTED BY THE USER TO BE DUMPED.  
SEE THE COMMENT AT SEQUENCE #00807480 FOR DETAILS.

00000845  
00000850  
00000860

COMMON=32.  
INHIBITS THE DUMP OF THE MCP PRT IDENTIFIERS SORTED  
ALPHABETICALLY AND BY PRT LOCATION.

00000870  
00000875  
00000880

COMMON=64.  
YIELDS AN OCTAL-ONLY DUMP OF MEMORY FORMATTED SIX WORDS/LINE.

00000890  
00000900  
00000905

COMMON=128.  
YIELDS AN ALPHA/OCTAL DUMP OF MEMORY. EACH PRINTED LINE  
CONTAINS FOUR WORDS OF OCTAL FOLLOWED, ON THE SAME LINE, BY  
THEIR ALPHA EQUIVALENT.

00000910  
00000920  
00000945

COMMON=256.

00000950  
00000960  
00000970

LAST PATCHED 12/11/73  
YIELDS AN ALPHA DUMP OF MEMORY FORMATTED TWELVE WORDS  
OF ALPHA PER PRINTED LINE.

00000980  
00000985  
00000990  
00000999  
00001000  
00001010

COMMON=384.

COMPLETELY INHIBITS THE PRINTOUT OF THE CONTENTS OF MEMORY.

THIS DOES NOT IMPLY THAT MEMORY IS NOT ANALYZED; VERIFICATION OF MEMORY LINKS IS MADE, THE RED AND SLATE ARE CHECKED, STACKS ARE LOCATED, ETC.

00001015

00001020

00001030

00001040

00001050

00001060

00001070

00001072

00001073

COMMON=512

CAUSES THE CONTENTS OF THE "ARGH" ARRAY TO BE PRINTED UP TO THE LAST VALID WORD POINTED TO BY "YECH". THIS INFORMATION IS PRESENT ONLY WHEN AN MCP PATCH, THE "ROIO" PATCH, HAS BEEN COMPILED INTO THE MCP.

00001074

00001075

00001076

00001077

00001078

PRT CELLS WHICH EXERCISE CONTROL FUNCTIONS

00001080

NOTE: PRT LOCATIONS SPECIFIED REFER TO OCTAL PRT LOCATIONS FOR USE IN AN "IN" MESSAGE.

00001085

00001090

00001100

PRT 25.

THIS CELL IS NORMALLY SET FROM THE RIGHT-MOST 3 DIGITS WHICH APPEAR ON A COMMON CARD; HOWEVER, THEY MAY BE EXPLICITLY SET AND/OR MODIFIED DURING EXECUTION OF THE ANALYZER VIA THE "IN" MESSAGE.

00001110

00001120

00001130

00001140

00001150

00001160

PRT 26.

THIS CELL CAN BE USED TO ENABLE A DUMP-BY-MIX-INDEX. IF SET TO A NON-ZERO DECIMAL NUMBER EQUAL TO THE MIX INDEX OF A JOB IN THE MIX AT THE TIME THE DUMP IS TAKEN, IT WILL CAUSE MEMORY AREAS BELONGING TO OTHER MIX INDEXES TO BE EXCLUDED FROM THE ANALYSIS.

00001165

00001170

00001180

00001190

00001200

00001210

NOTE THAT IF THE CONTENTS OF THIS CELL DOES NOT CORRESPOND TO A VALID MIX INDEX, \*NO\* NORMAL STATE STACKS WILL BE DUMPED NOR WILL ANY NORMAL STATE AREAS ASSOCIATED WITH ANY MIX INDEX BE PRINTED.

00001220

00001230

00001240

00001250

00001255

PRT 27.

THIS CELL MAY BE USED ONLY IN CONJUNCTION WITH THE PREVIOUSLY DESCRIBED COMMON CARD CONVENTION OF SPECIFYING AN OCTAL STACK ADDRESS AS THE FIRST 5 DIGITS OF THE COMMON VALUE. IF MADE NON-ZERO, THEN THE DECIMAL VALUE ENTERED IN CELL 27 WILL DETERMINE THE AMOUNT OF STACK DUMPED BELOW THE TOP-OF-STACK VALUE. IF LEFT ZERO, THE DEFAULT AMOUNT OF STACK DUMPED (AND ANALYZED) WILL BE 200 (DECIMAL) WORDS.

00001260

00001270

00001280

00001290

00001300

00001310

00001320

00001330

00001335

PRT 30.

THIS CELL, IF SET TO 1, WILL CAUSE THE PRINTOUT OF MEMORY TO BE DOUBLE-SPACED, OTHERWISE, THE PRINTOUT IS SINGLE-SPACED.

00001340

00001350

00001360

00001370

PRECEDENCE OF OPTIONS AND SUGGESTIONS FOR COMBINING THEM

00001380

00001390

00001400

AS STATED EARLIER, COMMON OPTIONS MAY BE USED SEPARATELY OR IN COMBINATION. ALTHOUGH MOST COMBINATIONS ARE ALLOWED, THERE ARE IMPORTANT EXCEPTIONS. THE RULES ARE:

00001410

00001420

1. A COMMON VALUE OF 1 PRECLUDES THE USE OF ALL OTHERS.

00001430

2. A COMMON VALUE OF 512 PRECLUDES THE USE OF ALL OTHERS BUT 1.

00001435

3. A COMMON VALUE OF 384 PRECLUDES THE USE OF ALL REMAINING COMMON VALUES EXCEPT FOR 16 AND 32. NOTE THAT 384 IS THE

00001440

00001450

SUM OF 128+256.

00001460

4. COMMON VALUES 2, 4, 8, 16, AND 32 ARE TOTALLY INDEPENDENT AND ADDITIVE IN ALL POSSIBLE COMBINATIONS.

00001530

00001540

SOME SPECIFIC EXAMPLES OF COMMON OPTIONS

A. "COMMON=35721432".  
 THIS CAUSES A "STACK" AT 35721 TO BE DUMPED ALONG WITH  
 OTHER STACKS; NONE OF MEMORY IS PRINTED(384), THE MCP PRT  
 IDENTIFIERS ARE NOT PRINTED(32), AND SELECTED ARRAYS ARE  
 DUMPED(16). THIS COMBINATION MIGHT BE USED TO PROVIDE A  
 MINIMUM OF OUTPUT AFTER A MEMORY DUMP HAS BEEN ONCE ANALYZED BUT  
 AFTERWARDS FOUND TO HAVE MISSED A STACK(IN THIS CASE,  
 LOCATED NEAR ADDRESS 35721).

B. "COMMON=12".  
 THIS ELIMINATES ALL OBJECT CODE FROM THE PRINTOUT OF  
 MEMORY.

C. "COMMON=66".  
 THIS ENSURES THAT AVAILABLE AREAS ARE ALWAYS PRINTED(2)  
 AND PROVIDES THAT MEMORY IS PRINTED IN OCTAL FORMAT ONLY(64).

D. "COMMON=8".  
 THIS TOGETHER WITH PRT 26 SET TO A VALID MIX INDEX REDUCES  
 THE AMOUNT OF OUTPUT OBTAINED DURING A MIX-ONLY DUMP. NO  
 MCP CODE IS PRINTED LEAVING ONLY NON-MCP CODE AREAS BESIDES  
 THOSE RELATING TO THE MIX INDEX BEING DUMPED. FINALLY, THE ONLY NORMAL  
 STATE STACK DUMPED IS THE ONE BELONGING TO THE PARTICULAR MIX  
 INDEX.

PROCESSING MULTIFILE DUMP TAPES

THE ANALYZER WILL AUTOMATICALLY PROCESS, IN A GIVEN RUN, ALL FILES  
 ON A "DPMT" TAPE IF LABEL EQUATION IS MADE TO ANY FILE BEYOND THE  
 FIRST ONE. THE ORDER OF ANALYSIS IS OPPOSITE THAT OF CREATION. FOR  
 EXAMPLE, IF LABEL EQUATION IS MADE TO THE FOURTH FILE, "FILE MDUMP=  
 MEMORY/DUMPO04", THE FOURTH FILE IS FIRST ANALYZED, THE THIRD NEXT,  
 THE SECOND AFTER THAT ONE AND THE FIRST FILE LAST. AS PROCESSING OF A  
 NEW FILE IS BEGUN, A MESSAGE IS WRITTEN TO THE CONSOLE SO THAT THE RUN  
 MAY BE DISCONTINUED IF NO FURTHER FILES ARE TO BE ANALYZED.

A COMMON VALUE MAY BE INCLUDED IN THE COMMENT PORTION OF THE  
 REMARKS ENTERED AFTER A "DPMT" COMMAND OR AFTER KEYING IN THE UNIT  
 WHEN USING THE MEMORY DUMP DECK. THE SYNTAX IS: "COMMON=<COMMON VALUE>  
 , WHERE "COMMON" MAY BE ABBREVIATED AS "COM" AND MUST BEGIN NO LATER  
 THAN THE 140TH CHARACTER OF THE MESSAGE. A COMMON VALUE ENTERED  
 IN THIS MANNER OVERRIDES ANY WHICH MAY BE SUPPLIED BY LABEL EQUATION,  
 ONE EXAMPLE IS: "DPMT COMMON=36; ALL JOBS APPEAR ASLEEP."

COMMENT\*\*\*\*\*  
 FOR EACH IDENTIFIER DEFINED IN THE ARRAY "PRTS", THERE MUST BE  
 A CORRESPONDING 4 WORD ENTRY IN "INFO". THE FIRST THREE WORDS  
 ARE RESERVED FOR THE IDENTIFIER TEXT. THE FOURTH MUST CONTAIN  
 THE CLASS OF THE IDENTIFIER AS DETERMINED BY THE ESPOL COMPILER.  
 THIS CLASS APPEARS IN THE FIRST FOUR COLUMNS OF THE STUFF CARD  
 FOR THIS IDENTIFIER. IF THE CLASS IS NOT KNOWN, A ZERO MAY BE  
 USED IN THE "INFO" ENTRY FOR IT. HOWEVER USING A CLASS OF ZERO WILL  
 INCREASE THE TIME NEEDED TO LOCATE THE PRT ADDRESS OF AN  
 IDENTIFIER. NOTE THAT ALTHOUGH ARRAY "PRTS" MAY CONTAIN GAPS  
 "INFO" MUST CONTAIN A DUMMY ENTRY COMPRISED OF ALL ZEROES(SEE, FOR  
 INSTANCE, PRTS[9], PRTS[10], AND PRTS[11]).  
 FOR CONVENIENCE, THE CLASS NUMBERS THAT THE ESPOL COMPILER MAY  
 ASSIGN AND WHICH MAY APPEAR ON A STUFF CARD ARE LISTED BELOW:

ARRAY AREATYPE[0:TYPMAX+1];

00295110

PROCEDURE FILLAREATYPE;

00295120

COMMENT\*\*\*AREATYPE[LINKTYPE], WHERE LINKTYPE IS THE TYPE OF MEMORY  
LINK TO BE PRINTED, CONTAINS A CODE WHICH DETERMINES THE FORMAT FOR  
PRINTING THE AREA : 1=OCTAL, 2=ALPHA/OCTAL, 3=ALPHA ONLY.

00295130

00295140

DUMPMEMORYANDNOTESTACKS DETERMINES LINKTYPE FROM [3:6] OF A PRIMARY  
LINK. PRINTCORE THEN OBTAINS AREATYPE[LINKTYPE] AND PRINTS THE AREA

00295150

00295160

00295170

IN THE APPROPRIATE FORMAT. ELEMENTS 0 THRU TYPMAX CORRESPOND TO  
POSSIBLE LINK TYPES, ELEMENT TYPMAX+1 IS USED TO CONTAIN THE DEFAULT  
FORMAT CODE USED IN PRINTING AN AREA WHICH DOES NOT BEGIN WITH A LINK

00295180

00295190

OR CONTAINS A CLOBBED LINK. THE CONTENTS OF AREATYPE ARE NOT  
USED IF DUMPOCTALONLY, DUMPALPHOCTAL OR DUMPALPHAONLY ARE SET OR  
IF AN AVAILABLE AREA IS BEING PRINTED WHOSE CORRESPONDING FORMAT

00295200

00295210

00295220

CODE IS NOT NEGATIVE. FOR EXAMPLE, A NEGATIVE CODE SUCH AS -2 CAUSES  
BOTH IN-USE AND AVAILABLE AREAS TO BE FORMATTED AS ALPHA/OCTAL. A  
CODE OF +2 WOULD CAUSE ONLY IN-USE AREAS TO BE PRINTED IN ALPHA/OCTAL-

00295230

00295240

00295250

AVAILABLE AREAS, IF PRINTED, WOULD BE PRINTED IN OCTAL ONLY.\*\*\*;
