Read This First

DECpage is a text-formatting product that enables users to format and print WPS-PLUS/VMS or ALL-IN-1 documents on the following printers:

- LPS40 (PrintServer 40)
- LN03R (ScriptPrinter)
- LN03 PLUS
- LN03
- LN01S
- LN01

Please make sure you have the following:

- Magnetic tape containing the DECpage software and release notes.
- *DECpage Installation Guide (AA-W602E-TE)* — explains how to install DECpage and run the Installation Verification Procedure. During the installation you can print or view the on-line release notes. You can also print additional copies later if you need them.
- *DECpage Style Designer's Guide (AA-HV30B-TE)* — explains how to customize styles for use with DECpage.
- *DECpage Getting Started (AA-W597E-TE)*
- *DECpage User's Guide (AA-W598E-TE)*
- *DECpage Style Samples (AA-W599C-TE)*
- *DECpage Quick Lookup (AV-W600E-TE)* — five copies.
- *DECpage Statement of Supported Versions (AA-LV60A-TE)*
- *DECpage Training Card (AV-MF58A-TE)*

If any documents are missing, contact your DIGITAL sales representative.

Notes to Installer

The following sections contain notes that may be of use when installing or running DECpage. In addition to the release notes, please ensure that all DECpage users are aware of any notes that affect routine use of DECpage.

Installation and System Management

The following notes pertain to DECpage installation and system management:

If you plan to upgrade your system from VMS V4.6 or VMS V4.7 to VMS V5.0, **and** your VMS system was configured to run in a non-clustered environment, **and** DECpage V2.1 or V3.0 was installed on the system disk then:

> You must reinstall DECpage V3.0 on a non-system disk **prior** to installing VMS V5.0. Make sure that you meet all of the requirements for installing DECpage, as described in the *DECpage Installation Guide*.

> If you must have DECpage on your system disk, then install DECpage V3.0 again on the system disk after you have upgraded your system to VMS V5.0.
