## Document Composition Facility: Text Programmer's Quick Reference

SX26-3723-5

## Fifth Edition (March 1985)

This edition contains information from and makes obsolete $5 \times 26-3723-4$; it also contains information from the Document Composition Facility:

Changes are made periodically to the information herein; before using this Changes are made periodically to the information herein; before using this
publication in connection with the operation of IBM systems, consult the publication in connection with the operation of ibM systems, consult the editions that are applicable and current.

References in this publication to IBM products, programs, or services do not imply that IBM intends to make these available in all countries in which IBM operates. Any reference to an IBM program product in this publication is not intended to state or imply that only IBM's program product may be used. Any functionally equivalent program may be used

Publications are not stocked at the address given below. Requests for
IBM publications should be made to your IBM representative or to the IBM IBM publications should be made to y

Comments may be addressed to IBM Corporation, Information Products Division, Box 1900, Department 580, Boulder, Colorado, U.S.A. 80301. IBM may use or distribute whatever information you supply in any way it believes appropriate without incurring any obligation to you.

| Option | Parameters | Description |
| :---: | :---: | :---: |
| BIND | ( bind) ${ }_{\text {( }}($ obind ebind) | Shift the page to the right. SCRIPTVS system symbol: \& $^{\text {SBO }}$, 8\$BE |
| CHARS | (fontl ... font4) | Specify up to four fonts. More than four external font-id's may be specified for page printer logical devices; however, formatting is not. <br> SCRIPT, SS system symbol: <br> \& $\$$ CHAR ( ${ }^{\text {S }}$ ) |
| continue |  | Continue processing after a nonsevere error occurs. |
| CTF |  | Prepare output in STAIRS/VS Condensed Text Format. |
| dDUT |  | Allows the redefinition of a SCRIPT/VS utility file to a nonutility file. |
| DEST | (station-id) | Specify a remote output station. (Valid only in TSO.) |
| device | (devtype) | Specify a logical output device. |
| FILE | [(fileid)] | Specify a disk file for output. (Hot valid in ATMS-III.) |
| fontlit | ( $\begin{gathered}\text { (filetype } \\ \text { [filemode })\end{gathered}$ | Specify a font library. |
| Index |  | Enable the .PI [Put Index] control word. <br> SCRIPT/VS system symbol: \&SINDX |
| LIB |  | Specify symbol and macro $1 \mathrm{i}-$ braries. (Only one in TSO, to eight in CMS and ATMS-III, to eight in CMS and ATMS-III.) |
| message | $\begin{aligned} & \text { ([DELAY] } \\ & \text { [IDACE]) } \end{aligned}$ | Control message printing. |
| nocont |  | Terminate processing after an error occurs. |
| NODDUT |  | Disallows the redefinition of a SCRIPT/VS utility file to a nonutility file. |
| Noprof |  | Suppress the profile. |
| NOSEGLIB |  | Suppress the segment 1ibrary. |
| NOSPIE |  | Prevententering SPIE exit rou- <br> tines. <br> TSO.) (Valid only in CMS and |
| Nowait |  | Prevent prompting for paper adjustment Valid only for typeWriter |
| number |  | Print file name and line number. Ignored for page printers. |
| OPTİONS | [(fileid)] |  |
| PAGE |  | Print pages selectively. (PROMPT is valid only in CMS and TSO.) |
| Print | (lcopies, class, | Produce printer output. In CMS ${ }_{3}$ will take advantage of virtual 3800 support in the VM/SP System Product. Suboptions are valid only in Tso.) |
| PROFILE | [(fileid)] | Specify a profile. (A file to be imbedded before the primary input file is processed.) |
| quiEt |  | $\begin{aligned} & \text { Suppress } \\ & \text { message. } \end{aligned}$ |
| SEARCH | $\begin{aligned} & \left.\begin{array}{l} \text { (1ibname) } \\ \text { (opnum } \end{array}\right) . . . \end{aligned}$ | Specify a library in TSO. Spec ify the default filetype for imbed and append fies in Soms. ATMS-1II. |
| seglib |  | Specify a page segment library. |
| SPELLCHK |  | Enable the .SV [Spelling Verification] control word. |
| stop |  | Print separate pages at the terminal. (Valid only for typeWriter terminals in CMS and TSO.) |
| syoff |  | Disables the SY CSystem Com- mand contron word. SYoFF is the default. Applicable only in the Tha tso and CMS environments only. |
| SYON |  | Enables the .SY [System Command] control Specified. word after SYOFF is Applicable only in the TSO and CMS environments. |
| SYSVAR | (n value ...) | Set symbol values for \&SYSVARn. |
| TERM |  | Display the output at a user's terminal. |
| tlib | (1ibname ...) | Specify spelling checking and hyphenation libraries. (Valid only in CMS.) |
| Twopass |  | Prepare with two formatting passes, and produce output on the second pass. <br> SCRIPT/VS system symbol: \&STWO |
| UNFORMAT |  | Print all input lines without formatting. Ignored for page printers: SCRIPT/VS <br> system symbol: \&今unf |
| UPCASE |  | Fold lowercase letters to uppercase before printing. |
| auser- option | $\underbrace{\text { options...)] }}_{\text {[(sub- }}$ | User-defined options, which must begin with the character "a". Begin with the cMs.) (Valid only in CMS |

| $\begin{aligned} & 4250 \mathrm{~A} \\ & 4250 \mathrm{~B} \\ & 4250 \mathrm{~L} \\ & 4250 \mathrm{AB} \\ & 4250 \mathrm{~A} 4 \end{aligned}$ | 4250 | (3) | $\begin{gathered} 8 \cdot 5 i \\ 11 \\ 8 \\ 8 \\ 297 \\ 29 \\ 21 \\ 21 \\ \hline \end{gathered}$ | $\begin{aligned} & 11 i \\ & 17 i \\ & 14 i \\ & 420 \mathrm{~mm} \\ & 297 \mathrm{~mm} \end{aligned}$ | 1 i | . 5 i | . 5 i | 6 i |  |

1 The physical device type corresponding to the TERM logical device can be either 2741 or 3270 , depending upon the actual terminal type.
$z$ This is a 12-pitch device; all other 1403 devices are 10 -pitch.
3 The linespacing for page printers is determined by the .LS [line Spacingl control word and the fonts used in the document.

| Date and Time ${ }^{1}$ |  |  |

1 These parameters' initial settings are based on the logical
output device.
2 The number of lines remaining, or $O N$ or $O F F$, is saved.
3 The composite current indention is determined from the . IN,
.IL, UN, and .OF control word values. These values are individually saved

The SCRIPT/VS Formatting Environment

| Attribute | Function |
| :---: | :---: |
| \& ${ }^{\prime}$ | Converts a numeric character string ${ }^{1}$ to a "base-26" lowercase alphabetic "number." |
| \& $A^{\prime}$ | Converts a numeric character string ${ }^{1}$ to a "base-26" uppercase alphabetic "number." |
| \& ${ }^{\text {d }}$ ' | Returns the depth of the material now in the specified named area. |
| \& ${ }^{\text {d }}$ ' | Converts a space designation ${ }^{1}$ to an equivalent number of horizontal device units. |
| \&DV' | Converts a space designation ${ }^{1}$ to an equivalent number of vertical device units. |
| \&E' | Verifies the existence of a symbol; the value is 1 if the symbol has been set; 0 if not. |
| \& $L^{\prime}$ | Yields the length of a character string ${ }^{1}$. |
| \& $\mathrm{r}^{\prime}$ | Converts a numeric character string ${ }^{1}$ into a lowercase roman numeral. |
| \&R' | Converts a numeric character string ${ }^{1}$ into an uppercase roman numeral. |
| \&SW' | Returns the width of a named segment. |
| \&SD' | Returns the depth of a named segment. |
| \& ${ }^{\prime}$ | Yields the type of the current value of a symbol. The type is either "N" for numeric or "C" for character. |
| $80^{\prime}$ | Converts a lowercase character string to uppercase. |
| $8 V^{\prime}$ | Yields the current value of a symbol. |
| \& W | Yields the measured length of a character string ${ }^{1}$ in figure spaces of the current font. If you want the length, of a character string in device units, use \&DV' or \&DH' in combination with \&W'. |
| 2x' | Converts a hexadecimal notation into a character string ${ }^{1}$. |
| The symbol | acter string or space designation may be the value of a |

Sx26-3723-5

' $\forall$ 'S' $\cap$ NI OELNIYd

| $\begin{array}{ccl} \text { ctl } \\ \text { Wd } \end{array}$ | Parameters | Description |
| :---: | :---: | :---: |
| . . | label [input line] | Set Label: Inserts a line that can be used as the target of a . GO control word. |
| . AA | tag $\left.\begin{array}{c}{[\text { apf }[\text { (rules })]} \\ {[a p f[(\text { rules })]}\end{array}\right]$ | Associate APF: Maps a GML tag to the macro or control word that processes it, and gives the attribute scanning rules for the tag. |
| . AN | $x$ test $y$ ìnput-line <br> "test" can be: <br> lt le eq ne gt ge | And: Tests the relationship between " $x$ " and "y". When the test is satisfied and the most recently processed IIF, AN, or . OR was also satisfied, SCRIPT/VS processes the input-line. |
| . AP | ```{namel(file-id)} [tokenl ... token14]``` | Append: Allows an additional file to be appended to the file just processed. |
| . AR | areaname$[0 N]$  <br>  $[$ TOPP <br>  $[R E P L A C E]$ <br>  $[D E L E T E]$ <br>  $[0 F F]$ <br>  $[P U T]$ | Area Begin: Specifies a group of lines to be kept in a named area for subsequent placement on a page. |
| . BC | [ONIOFF] | Balance Columns: Causes SCRIPT/VS to attempt to balance the columns by distributing text when a page eject occurs or when the column definition is changed. |
| . BF | [fontname] ... [=] | Begin Font: Causes SCRIPT/VS to use a new font. More than one font may be given; the first valid font listed will be used. <br> Default: Restarts the current font. |
| . BL |  | Blank Line: Results in one line of vertical space; is generrated by SCRIPT/VS and executed whenever a blank line is processed. |
| . BM | $[v\|+v\|-v]$ | Bottom Margin: Specifies the amount of space in the bottom margin area. Causes a break. <br> Initial Setting: Logical device dependent. <br> Default: Restores the initial setting. <br> SCRIPT/VS system symbol: $\& \$ B M$ |
| . BR |  | Break: Prevents the concatenation of the following text line with preceding text. |
| . BX | [NEW\|SET/OFF] <br> [rulename] [rulename LEFT\|h|RIGHT|/I] [CAN] [CHAR cname] | Box: Draws horizontal and vertical lines around subsequent output text. |
| . CB |  | Column Begin: Causes an eject to the next column (or next page). |
| .cc | [v] | Conditional Column Begin: Causes a column eject if less than a specified amount of space remains in the column. <br> Default: CC causes a column eject unless there is no data in the current column. |
| . CD | [n [h1 ... h9]] | Column Definition: Specifies the number of columns on the page and the position of each column. <br> Initial Setting: One column at position 0 . |
| . CE | $[1 / n\|O N\| O F F \mid$ <br> input-line] | Center: Centers text lines between the current left and right margins. |
| . CL | [ $0\|h\|+h \mid-h]$ | Column Line Length: Specifies the width of each column (all columns are the same width). <br> SCRIPT/VS system symbol: \& SCL |
| . CM |  | Comment: Identifies a comment line. |
| . CP | [v] | Conditional Page Eject: Causes a page eject if less than a specified amount of space remains on the page. Default: CP causes a page eject unless there is no data on the current page. |
| .cs | n [INCLUDEIIGNORE] <br> n [ONIOFF] | Conditional Section: Allows conditional inclusion of input in the formatted output. <br> Initial Setting: All conditional sections included. |

(10)

| ct1 <br> Wd | Parameters | Description |
| :---: | :---: | :---: |
| . CT | [input-line] | Continued Text: Appends the inputline to the previous input text without an intervening word space. |
| . DA | areaname $h[v]$ <br> [PAGE] <br> [BODY] <br> [SECTION] <br> [FONT fontname] <br> [WIDTH h] <br> [DEPTH v] <br> [ROTATE rotation] | Define Area: Defines a named area. |
| . DC | ```{parameter char ...loFF]``` | Define Character: Defines the characters for special functions. <br> Parameters: <br> ASEP: Array element separator characters <br> CONT: Line continuation character ( $8 \$ \mathrm{CONT}$ ) <br> CW: Control word separator (\&\$CW) <br> GML: GML tag delimiter ( $\& \$ G M L$, <br> \& $\$$ EGML) <br> IXB: Index term blanks <br> IXI: Index term nulls <br> STOP: End-of-sentence characters <br> PUNC: Punctuation characters <br> PS: Page number symbol ( $\&$ SPS) <br> RB: Required blank (\&\$RB) <br> WORD: Word delimiter characters <br> MCS: Markup content separator char~ acter <br> Initial Settings: |
| . DD | $\begin{aligned} & \text { name } \\ & \text { [LIB\|DD\|DSN file-id] } \end{aligned}$ | Define Data File-id: Specifies the file-id of a file to be used with the IM [Imbed], AP [Append] or . WF [Write To File] control words, or with utility files. |
| . DF | fontname <br> [USIUPIUCISTOPI <br> OS RPT nIOS CHAR cl <br> BOX cnamel <br> FONT [font-id]। <br> TYPE [(] <br> description [)] <br> CODEPAGE cp-id | Define Font: Defines internal fonts composed of external font characteristics and line formatting functions. |
| . DH | n [options] | Define Head Level: Defines the format and characteristics of the section headings produced by the . Hn control words. <br> Default: Restores initial settings. |
| . DL | name [name] ... | Dictionary List: Names spelling checking and hyphenation dictionaries. |
| . DM | $\begin{aligned} & \text { name } \\ & \text { [/linel/ } . / \text { linen[/] } \\ & \text { x\|LIBIOFFj } \\ & \text { name } \\ & \text { [/line[/] } \\ & \text { [x\|0FF] } \\ & {[\text { name ON] }} \\ & {[0 F F]} \end{aligned}$ | Define Macro: Defines a macro using text, SCRIPT/VS control words, and special symbols. Macros may be defined inline without prefixing each line of the macro with a .DM [Define Macrol control word. |
| . DR | rulename [WEIGHT h] [FONT fontname] | Define Rule: Defines named rules of varying thickness. |
| . DS |  | Doublespace Mode: Causes subsequent output lines to be doublespaced. |
| . DU | (ADD\|DEL) word ... | Dictionary Update: Adds words to or deletes words from an addenda dictionary, which is used to supplement a SCRIPT/VS main dictionary for spelling verification and hyphenation. |
| . DV | [symname] <br> [Font fontname] <br> [Baseline b] <br> [/string[/] <br> [symname] <br> [Text] <br> [/string[/] | Define Variable: Defines and assigns value to text variables. |
| . EC | input line | Execute Control: Executes the input line as a control word even if there is a macro of the same name. |
| . EF | [CLOSE] | End of File: Simulates an end of file condition. |
| . EL | [input-line] | Else: Processes the input-line if the most recently executed.IF,.AN, or . OR control word was not satisfied. |
| . EM | input line | Execute Macro: Executes the input line as a macro even if macro substitution is off. |
| . EQ |  | Equation: A reserved control word. |

(11)

| $\begin{aligned} & \text { ct1 } \\ & \text { Wd } \end{aligned}$ | Parameters | Description |
| :---: | :---: | :---: |
| . ES | $\underset{[B Y[f]]}{[\operatorname{NORMAL}[h]]}$ | Extra Space: Controls the formatting of multiple blanks by specifying the width of the extra spaces. |
| . FL | [ONIOFFIDUMP] <br> [TOP\|BOTTOM] <br> [COL PAGE] <br> [ODD\|EVEN] <br> [ORDER] | Float: Delimits a group of lines to be kept together and placed at the top or bottom of a column or page. |
| . FN | (ONIOFFILEADER) | Footnote: Saves formatted text and prints it at the bottom of the page in single-column format. |
| . FO | [ONIOFFI <br> [EFT\|RIGHTICENTER INSIDE OUTSIDE] [EXTEND|TRUNC|FOLD] | Format Mode: Controls concatenation and justification of input lines. <br> Initial Setting: ON EXTEND |
| . FV | [TOP] <br> [CENTER] <br> [BOTTOM] <br> [JUSTIFY] | Format Vertically: Specifies whether text is to be vertically justified. Also may be used to specify if text is to be at the top, bottom, or center of the columns if it is not justified. <br> Initial Setting: TOP |
| . 60 | [TO] label | Go To: Causes SCRIPT/VS to locate the input line identified with "label" and resume processing with that input line. |
| . GS | [parameters] | GML Services: Provides a variety of functions helpful in writing APFs, including attribute scanning and symbol manipulation. |
| .HR | [rulename] <br> [LEFT] [TO] [RIGHT] [h1] [TO] h2] [hl FOR length] | Horizontal Rule: Places a horizontal rule in the current column. |
| . HW | text-word | Hyphenate Word: Specifies hyphenation points for a word that might need to be hyphenated during formatting. |
| .HY | parameters | ```Hyphenate: Controls the SCRIPT/VS au- tomatic hyphenation function and ex- pansion and compression ranges. Initial Settings: OFF LADDER = 2 MAXPT =2 MINPT = 4 MINWORD = 6 RANGE = 1.0 Default: Initial setting.``` |
| . Hn | [text-line] | Head Level $n$ : Formats a section heading according to default characteristics supplied for the heading. |
| . IC | [ESPACE [ $\begin{gathered}h] \\ [-h]]\end{gathered}$ | Intercharacter Space: Controls the insertion of extra space between characters. Ignored for line devices. <br> Initial Setting: 0 <br> Default: Restores initial setting. |
| . IE | \{H\|l|2|3\} string | Index Entry: Formats an index entry when generated by the .IX [Index] control word. |
| . IF | ```x test y [input-line] "test" can be: lt le eq ne gt ge <t le eq ne gt ge >``` | If: Tests the relationship between " $x$ " and " $y$ ". When the test is satisfied, SCRIPT/VS processes the input-line. Otherwise, SCRIPT/VS ignores the input-line. "x test $y$ " can also be: <br> SYSPAGE eqlne EVENIODD <br> SYSOUT eqlne PRINT\|TERM|PAGE |
| . IL | [ $0\|h\|+h \mid-h]$ | Indent Line: Indents the next output line the specified amount of horizontal space. <br> Initial Setting: 0 |
| . IM | $\begin{aligned} & \text { \{name\|(file-id)\} } \\ & \text { [tokenl } . . \text { tokenl4] } \end{aligned}$ | Imbed: Processes the named file at this point. |
| . IN | $\begin{aligned} & {[0\|h\|+h \mid-h]} \\ & {[F O R v 1]} \\ & \text { [AFTER v2] } \\ & \text { [NOBREAK] } \end{aligned}$ | Indent: Specifies the amount of space subsequent output lines are to be indented from the current left margin. <br> May cause a break. <br> SCRIPT/VS system symbol: $8 \$$ IN <br> Initial Setting: |
| . IR | $\begin{aligned} & {[0\|h\|+h \mid-h]} \\ & {[F O R v 1]} \\ & {[A F T E R \text { v2] }} \\ & \text { [NOBREAK] } \end{aligned}$ | Indent Right: Specifies the amount of space subsequent output lines are to be indented from the current right margin. <br> May cause a break. <br> SCRIPT/VS system symbol: \&SIR <br> Initial Setting: 0 |
| . Is |  | Inline Space: Inserts a specified amount of horizontal white space into the current line. |

SCRIPT/VS Control Word Summary (Part 3 of 7)

| $\mathbf{W d}_{\mathbf{W d}}$ | Parameters | Description |
| :---: | :---: | :---: |
| . It | [ON\|OFF|ALLI <br> CTLIGMLIMACISUBI <br> SNAPISTEPIRUN] <br> Response to STEP: (null) <br> PRE input-line <br> REP input-line | Input Substitution Trace: Provides a trace of processing for each SCRIPT/VS control word and macro, as well as symbol substitution. When IT STEP is in effect, the user responds interactively. Initial Setting: OFF. |
| . Ix | $\left[\begin{array}{ll} {[\ln \ln ]} \\ \text { namel control } \mid /] \end{array}\right.$ | Index: Generates an index from terms previously specified with the .PI control word. |
| . KP | $\begin{aligned} & \text { CONIFLOAT\|DELAY\| } \\ & \text { INLINEIV\|v+ }+ \text { IOFF } \end{aligned}$ | Keep: Ensures that a group of output lines are kept together in the same column. <br> SCRIPT/VS system symbol: \&SKP |
| . LB |  | Leading Blank: Causes a break. |
| .LI | $\begin{aligned} & \text { [1/nION\{OFF\| } \\ & \text { input-line } \end{aligned}$ | Literal: Ensures that input lines are treated as text lines by SCRIPT/VS (used when a text input line begins with a period) <br> Initial Setting: OFF. |
| .LL | $[h\|+h\|-h]$ | Line Length: Specifies the length of lines in running headings and running footings. <br> SCRIPTVS system symbol: \&SLL <br> Initial Setting: Logical device dependent. <br> Default: Restores initial setting. |
| . 10 | [ v ] | Lead-out: Identifies a place in a column where a specified amount of extra vertical white space may be placed during vertical justifica- tion. |
| .Ls | [parameters] | Line spacing: Controls the depth of lines of text. Also controls allowable ranges of compression and expansion for vertical justification. Initial Settings: <br> NORMAL - font dependent <br> BY RANGE -1.0 - 1.0 <br> Default: Restores initial setting. |
| .LT |  | Leading Tab: Causes a break. |
| .LY | [ONIOFFISYMIMAC] | Library: Specifies whether a library is to be used to resolve symbol and macro definitions. Use the LIB option to identify the libraries. <br> Initial setting: OFF. |
| .mc |  | Multicolumn Mode:Restores column definition saved by a previous. SC [Single Column Mode] control word. |
| .ME | [input-line] | Macro Exit: Ends a macro and returns control to the macro'scaller. The input-line is processed as though it were part of the macro's caller. |
| .MG | /[code]/message/[/] | Message: Produces a message similar in format to the SCRIPT/VS error messages. |
| .Ms | [ONIOFF] | Macro Substitution: Causes SCRIPT/VS to recognize and process macros. <br> Initial Setting, OFF <br> Default: ON |
| . NF |  | ```No Formatting: Cancels or restores concatenation of input lines and justification of output lines. Initial Setting: OFF EXTEND Default: ON``` |
| . NL |  | Null Line: Causes a break. |
| . OC | \{1inel'string' | Output Comment: Specifies data that is to be inserted into the output document as it is, as an output comment. Ignored for page printers. |
| . OF | $[\underline{Q}\|\mathrm{~h}\|+\mathrm{h} \mid-\mathrm{h}]$ | Offset: Causes a hanging indention (a paragraph in which the indention of the first line is unchanged and subsequent lines are indented to the offset value.) <br> SCRIPT/VS system symbol: \&SOF <br> Initial Setting: 0 |
| . OR | $x$ test y [input-line] <br> "test" can be: <br>  | or: Tests the relationship between "x ${ }^{n}$ and $y^{\prime \prime}$. When the test is satisfied or the most recently executed IF, iAN SCRIPT/VS processes the input-line. |

| $\begin{aligned} & \text { ct1 } \\ & \text { Wd } \end{aligned}$ | Parameters | Description |
| :---: | :---: | :---: |
| . PA | $\begin{aligned} & {[n\|+n\|-n]} \\ & \text { [NOSTART] } \\ & \text { [ODD\|EVEN] } \\ & \text { [ONIOFF] } \end{aligned}$ | Page Eject: Causes a page eject, and can set the page number of the new page. Default: Ejects to next sequential page. |
| . PF |  | Previous Font: Causes the last stacked font to become the current font. |
| . PI | [START/END\|ORDER|REF] [KEY/k1/k2/k3/] <br> $/ t 1[/ t 2[/ t 3[/ p n]]]$ | Put Index: Puts a multi-level term in the index. |
| . PL | [v\|+v|-v] | Page Length: Specifies the amount of space, including top and bottom margins, for each output page. <br> Initial Setting: Logical device dependent. <br> Default: Initial Setting. <br> SCRIPT/VS system symbol: \&今PL |
| . PM | $\begin{array}{lll} {\left[\begin{array}{cc} h] & {[ } \end{array} h_{2}\right] \text { [NOBIND] }} \\ {[+h]} & {[+h 2]} \\ {[-h]} & {[-h 2]} \end{array}$ | Page Margins: Overrides page binding set with BIND option of the SCRIPT command unless NOBIND parameter was specified. <br> Initial Setting: Logical device and binding dependent. <br> Default: Initial Setting <br> SCRIPT/VS system symbols: \&\$BO, \& $\$$ BE |
| . PN | (n\|ONIOFFIOFFNOI ARABICIROMAN|ALPHAI NORMIFRACI PREF string\} | Page Numbering Mode: Controls external and internal page numbering. Initial Setting: Arabic numerals from 1. <br> SCRIPT/VS system symbol: \&SPN |
| . PT | input-line | Put Table of Contents: Places the input line (which may be a control word, macro, GML tag, symbol, or line of text) into the file used to accumulate table of contents entries (DSMUTTOC). |
| . PW |  | Page Width: Specifies the width of the logical page, including the page margin (binding). <br> Initial Setting: Logical device dependent. <br> Default: Initial setting. <br>  |
| . PX | ${ }_{[ }^{[\underset{~ N U L L}{ }]\left[\frac{\text { OFF }}{}\right]}$ | Prefix: Specifies that lines read from input files that begin with specific control characters be prefixed with given character strings. |
| . QQ |  | Quick Quit: Causes SCRIPT/VS processing to terminate immediately without completing the current page. |
| . QU |  | Quit: Causes SCRIPT/VS processing to terminate after completing the current page. |
| . RC | $\begin{aligned} & \text { n }\{O N\{O F F\|O N / O F F\| c\} \\ & * \text { c } \\ & \text { ADJUST } \underline{2} \mid h \end{aligned}$ | Revision Code: Specifies a revision code symbol that is to be printed to the left of the output line that contains updated material. |
| . RD |  | Read Terminal: Allows user to type in one or more text lines while a file is being formatted, |
| . RE | [envname〕 | Restore Environment: Restores environments that have been previously saved with the .SA [Save Environment] control word. Environments may be restored by name. |
| . RF | $\begin{aligned} & \text { [ON\|OFFICANCEL] } \\ & \text { [ODD\|EVEN] } \\ & \text { [CANCEL\|SUP\|RES] } \\ & \text { [EXECUTE] } \end{aligned}$ | Running Footing: Specifies input lines that are to be saved as a running footing and processed at the bottom of each appropriate page. |
| . RH | $\begin{aligned} & \text { [ON\|OFF\|CANCEL] } \\ & \text { [ODD\|EVEN] } \\ & \text { [CANCEL\|SUP\|RES] } \\ & \text { [EXEUTE] } \end{aligned}$ | Running Heading: Specifies input lines that are to be saved as a running heading and processed at the top of each appropriate page. |
| . RI | [1/n\|ON|OFF| input-line] | Right Adjust: Produces output lines that are unconcatenated input lines aligned with the right-hand margin. |
| . RN | [ON1OFF] | ```Reference Numbers: Numbers output lines serially in body of page. Ig- nored for page printers. Initial Setting: OFF.``` |

| $\begin{aligned} & \mathrm{ct1} \\ & \mathrm{Wd} \end{aligned}$ | Parameters | Description |
| :---: | :---: | :---: |
| . RV | symname [ [=]'] | Read Variable: Allows user to assign a value to a symbol name by entering it at the terminal in response to an interactive request made while SCRIPT/VS is processing the input file. |
| . SA | [envname] | Save status: Saves the current values and parameters of the formatting environment. Environments may be saved by name. |
| . SB |  | Shift Easeline: Specifies that subsequent text is to be placed above or below the normal baseline. Ignored for line devices. <br> Initial Setting: 0 <br> Default: Return current baseline to normal baseline. |
| .sc |  | Single-Column Mode: Causes SCRIPT/VS to save the current column definition and format subsequent input lines in a single column. |
| . SE | ```symname[( }n\mathrm{ )] *qstring['] symname[(n)] = [symvalue] [&] [SUBSTR str start length [INDEX strl [str2] symname[(n)] OFF symname LIB``` | Set Symbol: Defines a symbol name and assigns a value to it. |
| . SI | segname <br> [WIDTH h] [DEPTH v] [INL INE] | ```Segment Include: Identifies a segment to be included in the document at the current column position. Ignored for line devices.``` |
| . Sk | [l\|V] [A] [C] [P] | Skip: Specifies the amount of space to insert before the next text output line. No lines are inserted if the SK occurs at the top of a page or column. |
| . 50 | [DOC name] <br> [PID naa] <br> [OPR number] <br> [RPW password] <br> [DPW password] | STAIRS Output: Specifies information for STAIRS/VS CTF output. |
| . SP | [1/v] [A] [C] [P] | Space: Specifies the amount of space to insert before the next text output line. The specified number of lines are inserted even when the .SP occurs at the top of a page or column. |
| . ss |  | Single-Space Mode: Causes subsequent output lines to be single-spaced. |
| . SU | $\left[\frac{1}{l}\|n\| O N\|O F F\|\right.$ | Substitute Symbol: Controls the substitution of symbols with their previously assigned values. <br> SCRIPT/VS system symbol: \&SSU <br> Initial Setting: $O N$ |
| . Sv | $\begin{aligned} & \text { [ONIOFF] } \\ & \text { [NOADD] } \\ & \text { [NOSTEM] } \\ & \text { [NUM] } \end{aligned}$ | Spelling Verification: Defines the start and functions of the SCRIPT/VS spelling verification function. <br> Enabled with the SPELLCHK option. <br> Initial Setting: $0 N$. |
| . sx | [F\|C] <br> /lpart/fill/rpart/ | Split Text: Produces an output line of three parts: "left" is aligned with the current left margin; "right" is aligned with the current right margin; "fill" is centered or repeated between the two strings. |
| . TC | $\left[\frac{1}{l \mid n]}[\text { namelcontrol\|/] }\right.$ | Table of Contents: Imbeds the table of contents file (DSMUTTOC), which consists of table of contents entries automatically generated by the . Hn control words, and entries inserted with the .PT [Put Table of Contents] control word. <br> Use the TWOPASS option if the table of contents is not at the back of the document. |
| . TE | [1/n\|ON|OFF] | Terminal Input: Allows user to enter lines interactively from the terminal when the file is formatted. |

SCRIPT/VS Control Word Summary (Part 6 of 7)
(15)

| $c t 1$ $\mathrm{Wd}$ | Parameters | Description |
| :---: | :---: | :---: |
| . TH | [input-line] | Then: Processes the input-line if the most recently executed. IF, AN, or .OR control word was satisfied. |
| . TI | [st...] | Translate Input: Specifies character translations to be performed on input lines before SCRIPT/VS processing begins. <br> Initial Setting. No translate is in effect. <br> Default: Restores the initial setting. |
| . TM | [v\|+v|-v] | Top Margin: Specifies the amount of space in the top margin area. <br>  <br> Initial Setting: Logical device dependent. <br> Default: Restores the initial setting. |
| .TP |  | Tab Position: Specifies tab settings and allows text to be left-, cen-ter-, right-, or character-aligned at each tab position. <br> Default: Clears the tab table. |
| .TR | $[s t \ldots]$ | Translate Character: Specifies character translations to be performed on output. <br> Default: Restores the initial output translate table. |
| .TS | [/string/IOFF\|IGNORE] | ```Translate String: Translates a single character into a string.``` |
| . TU | [s t . . ${ }^{\text {] }}$ | Translate Uppercase: Specifies character translations to be performed for capitalization. <br> Initial Setting: No translate is in effect. <br> Default: Restores the initial setting. |
| . TY | input-line | Type On Terminal: Types the input line on the user's terminal during formatting. |
| . Uc | [l\|n|ON|OFFI inputline] | ```Underscore and Capitalize: UNDER- SCORES AND CAPITALIZES one or more subsequent input lines. Initial Setting: OFF Default: l``` |
| .UD |  | Underscore Definition: Determines whether blanks will be underscored when the .UC and .US control words are used. <br> Initial Setting: $O N$ <br> Default: Restores the initial setting. |
| .UN | $[\underline{0}\|h\|+h \mid-h]$ | Undent: Causes the next output line's indention to change. It is moved to the left of the current left margin. Initial Setting: 0 Default: 0 |
| .UP | $\left[\begin{array}{l} {[1\|n\| O N\|0 F F\|} \\ \text { input-line }] \end{array}\right.$ | ```Uppercase: Prints one or more subse- quent input lines in UPPERCASE char- acters. Initial Setting: OFF Default: 1``` |
| .us | $\left[\begin{array}{l}{\left[\begin{array}{l}\text { InlONIOFF } \\ \text { input-line }\end{array}\right]}\end{array}\right.$ | Underscore: Prints one or more subsequent input lines with underscored characters. <br> Initial Setting: OFF <br> Default: 1 |
| . UW | [word word ...] | Unverified Words: Generated by spelling verification for unverified words. |
| . VR | ```[rulename] [h\|LEFT|RIGHT] [LALIGN] [CENTER|RALIGN] [OFF]``` | Vertical Rule: Place vertical rules in the column. <br> SCRIPT/VS system symbol: \& $\$$ VR |
| .WF | ```[1/n\|ON|OFF| TAG IMBED|ERASE| input-line]``` | Write to File: Writes one or more input lines to the output file DSMUTWTF. <br> IMBED: imbeds file DSMUTWTF. <br> ERASE: erases file DSMUTWTF. |
| .ws | $\underset{[B Y[f]}{[\operatorname{NORMAL}}\left[\begin{array}{l} {[h]} \\ \hline \end{array}\right.$ | Word Space: Controls the width of word spaces. <br> Initial Setting: Dependent on default wordspace value of the current font. Default: Restores the initial setting. |
| .WZ | [ONIOFF] | ```Widow Zone: Turns widow processing on or off. Initial Setting: ON Default: ON``` |

SCRIPT/VS Control Word Summary (Part 7 of 7)

| Space Unit | Specified As | Examples |
| :---: | :---: | :---: |
| Centimeter | acm | $4.25 \mathrm{~cm} \quad 2,54 \mathrm{~cm} \quad 15 \mathrm{~cm}$ |
| Character (Horizontal) | a | $512.511,33$ |
| Cicero | $n \mathrm{Cp}$ | ```cl2 (12 didot points) 2c3 (2 ciceros and 3 points) c1.5 (1.5 didot points)``` |
| Device Unit (Horizontal) | nDH | 10 dh 600 dh |
| Device Unit (Vertical) | nDV | 10 dv 600dv |
| Em-space (Horizontal) | aMH -or- aM | $6 \mathrm{mh} \mathrm{6m} \mathrm{}$. |
| Em-space <br> (Vertical) | amv | 1 mv . 5 mv |
| Inch | aI | 3.5 i 6,5i .75i |
| Line (Vertical) | a | $23.51,75$ |
| Millimeter | aMM | $12.7 \mathrm{~mm} \quad 25,4 \mathrm{~mm} \quad 100 \mathrm{~mm}$ |
| Pica | $n \mathrm{Pp}$ | ```p6 (6 points) 3p2 (3 picas and 2 points) pl.5 (1.5 points)``` |

Where:
a is a number of centimeters, characters, ems, inches, up to two decimalers. The number may be fractional, With comma (,) can be used to separate the integral and fractional portions of the number.
$n$ is a number of whole ciceros, picas, or device units.
$p$ is a number of points. (There are twelve points in a cicero or pica, and 72 points in an inch.)

Space Units Notation

|  | . HO | . H 1 | . H 2 | . H 3 | . H 4 | . H 5 | . H 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| New page for heading |  | yes |  |  |  |  |  |
| Section breaks around heading |  | yes |  |  |  |  |  |
| Heading alignment |  | out- <br> side | left | left | left |  |  |
| Space before heading | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Skip before heading | 0 | 0 | 3 | 3 | 3 | 1 | 1 |
| Space after heading | 0 | 5 | 2 | 2 | 2 | 0 | 0 |
| Heading underscored |  | yes | yes |  | yes | yes | yes |
| Heading capitalized |  | yes | yes | yes |  | yes |  |
| Break before heading |  | yes | yes | yes | yes |  |  |
| Table of Contents entry | yes | yes | yes | yes |  |  |  |
| Table of Contents only | yes |  |  |  |  |  |  |
| Skip before T.O.C. entry . |  | yes |  |  |  |  |  |
| T.O.C. indention | 0 | 0 | 0 | 2 | 4 | 6 | 8 |
| Automatic hyphenation | 0 | yes | yes | yes | yes | yes | yes |
| Hanging indent | 0 | no | no | no | no | no | no |

The . DH [Define Head Level] control word is specified as
where " $n^{n}$ " is the head-level being defined, and "options" are:
$\begin{array}{ll}\text { BR, NBR } & \text { Cause a break after heading } \\ \text { PA, NPA } & \text { Start a new page for the heading } \\ \text { TC, NTC } & \text { Create table of contents entry for }\end{array}$
TO, NTO
TS, NTS
UP, NUP
US, NUP

FONT fontname
SPBF $v$
SKBF V
SPAF $V$
TCIN h
Create table of contents entry for the heading
Table of contents entry only
Skip before table of contents entry
Capitalize the heading
Separate table of contents entry from page number with
"dot-1eader"
Number heading with decimal section number
Place heading in a single column section
Make heading automatically eligible for hyphenation
Center the text of a heading
eft justify the text of a heading
Align the text of a heading against the inside margin
Align the text of a heading against the outside margin
Right align the text of a heading
Do not format a multiple line heading in hang indent style
ormat a multiple line heading in hang indent style utomatically format a multiple line heading in hang ndent style
Specify font to be used for the heading
Amount of space to precede the heading
Amount of space to be skipped before the heading
Amount of space to follow the heading
Amount of indention for table of contents entry
Specify the font for table of contents entry
