

Tables of Contents 1962-1967

Volume 1 1962

September

A program for optimal control of nonlinear processes <i>R. A. Mugele</i>	2
A general purpose systems simulator <i>G. Gordon</i>	18
Simulation in systems engineering <i>E. C. Smith, Jr.</i>	33
Tables, flow charts, and program logic <i>M. Montalbano</i>	51
A multiprocessing approach to a large computer system <i>F. R. Baldwin, W. B. Gibson, and C. B. Poland</i>	64
The trim problem <i>R. E. Gomory</i>	77
On modifying the 1620 ADD table <i>G. Gerson</i>	82

March

Economic evaluation of management information systems <i>D. F. Boyd and H. S. Krasnow</i>	2
Computer construction of minimal project networks <i>B. Dimsdale</i>	24
Sequential data processing design <i>V. P. Turnburke, Jr.</i>	37
Optimum response analysis <i>C. F. Kossack</i>	49
Programming considerations for the 7750 <i>N. Sternad</i>	57
Recovery for computer switchover in a real-time system <i>H. Nagler</i>	76

June

File organization and addressing <i>Werner Buchholz</i>	86
Note on random addressing techniques <i>W. P. Heising</i>	112
Programming notation in systems design <i>K. E. Iverson</i>	117
On the location of supply points to minimize transportation costs <i>F. E. Maranzana</i>	129
Statistical classification techniques <i>C. F. Kossack</i>	136
Design of an integrated programming and operating system	152
Part I System considerations and the monitor <i>A. S. Noble, Jr.</i>	153
Part II The assembly program and its language <i>R. B. Talmadge</i>	162

September-December

An intrinsically addressed processing system <i>J. E. Griffith</i>	182
Project evaluation and selection <i>B. Dimsdale and H. P. Flatt</i>	200
A directly coupled multiprocessing system <i>E. C. Smith, Jr.</i>	218
Dynamic storage allocation for a real-time system <i>B. I. Witt</i>	230
A computer-operated laboratory data-taking system <i>H. Cole, Y. Okaya, and F. W. Chambers</i>	240
A pattern identification system using linear decision functions <i>J. S. Griffin, Jr., J. H. King, Jr., and C. J. Tunis</i>	248
Requirements generation, explosions, and bills of material <i>F. L. Church</i>	268
Generation of input data for simulations <i>S. Yagil</i>	288
Design of an integrated programming and operating system	297
Part III The expanded function of the loader <i>R. Hedberg</i>	298
Part IV The system's FORTRAN compiler <i>R. Lerner</i>	311
Part V The system's COBOL compiler <i>R. T. Dorrance</i>	322

Volume 3 1964

Number One

Storage requirements for a data exchange <i>I. Delgalvis and G. Davison</i>	2
Systems simulation with digital computers <i>K. Blake and G. Gordon</i>	14
A general purpose digital simulator and examples of its application	21
Part I Description of the simulator <i>R. Efron and G. Gordon</i>	22
Part II Simulation of a telephone intercept system <i>C. R. Velasco</i>	35
Part III Digital simulation of urban traffic <i>A. M. Blum</i>	41
Part IV Simulation of an integrated steel mill <i>D. F. Boyd, H. S. Krasnow, and A. C. R. Petit</i>	51
A description of the SIMSCRIPT language <i>B. Dimsdale and H. M. Markowitz</i>	57
A character computer for high-level language interpretation <i>J. E. Meggitt</i>	68
Design of an integrated programming and operating system	
Part VI Implementation on the 7040/44 data processing system <i>B. White and J. Trimble</i>	79
Algorithm for a gear-train problem <i>H. G. ApSimon</i>	95
A concordance generator <i>K. F. Scharfenberg, P. H. Smith, Jr., and R. D. Villani</i>	104

Number Two

The structure of SYSTEM/360	
Part I Outline of the logical structure <i>G. A. Blaauw and F. P. Brooks, Jr.</i>	119
Part II System implementations <i>W. Y. Stevens</i>	136
Part III Processing unit design considerations <i>G. M. Amdahl</i>	144
Part IV Channel design considerations <i>A. Padeys</i>	165
Part V Multisystem organization <i>G. A. Blaauw</i>	181

Number Three

A formal description of SYSTEM/360 <i>A. D. Falkoff, K. E. Iverson, and E. H. Sussenguth</i>	198
---	-----

Number One

An interpretive program for matrix arithmetic <i>F. H. Branin, Jr., L. V. Hall, J. Suez, R. M. Carlitz, and T. C. Chen</i>	2
Algorithm for computer control of a digital plotter <i>J. E. Bresenham</i>	25
An analysis of floating-point addition <i>D. W. Sweeney</i>	31
On the reliability of polymorphic systems <i>P. D. Welch</i>	43
A technique to control waiting time in a queue <i>S. Shapiro</i>	53
Notes on testing real-time system programs <i>M. G. Ginzberg</i>	58
Serial compilation and the 1401 FORTRAN compiler <i>L. H. Haines</i>	73

Number Two

Fabrication and assembly operations	86
Part I The outlines of a control system <i>C. T. Baker</i>	87
Part II Long-range planning techniques <i>A. B. Calica</i>	94
Part III Matrix methods for processing configuration data <i>P. G. Loewner</i>	105
Part IV Linear programming in production planning <i>B. P. Zielinski</i>	122
The construction of discrete dynamic programming algorithms <i>M. Held and R. M. Karp</i>	136
Algorithms for traffic-signal control <i>L. A. Yardeni</i>	148
Computer channel interference analysis <i>W. Chang and D. J. Wong</i>	162

Number Three

GPSS III—An expanded general purpose simulator <i>H. Herscovitch and T. Schneider</i>	174
On dynamic program relocation <i>W. C. McGee</i>	184
A computer-aided linkage analysis system <i>F. Bitonti, D. W. Cooper, D. N. Frayne, and H. H. Hansen</i>	200
Fabrication and assembly operations	224
Part V Production order sequencing <i>A. B. Calica</i>	225
Part VI Parameter values for sequencing control <i>S. Gorenstein</i>	241
Part VII Adaptive control in production planning <i>S. Shapiro</i>	250

Volume 5 1966

Number One

The functional structure of OS/360	2
Part I Introductory survey <i>G. H. Mealy</i>	3
Part II Job and task management <i>B. I. Witt</i>	12
Part III Data management <i>W. A. Clark</i>	30

Number Two

Macro language design for SYSTEM/360 <i>D. N. Freeman</i>	62
A study of replacement algorithms for a virtual-storage computer <i>L. A. Belady</i>	78
Computation of e^x with the use of large tables <i>K. Spielberg</i>	102
A queuing model for a simple case of time sharing <i>W. Chang</i>	115

Number Three

On teleprocessing system design	
Part I Characteristic problems <i>W. P. Margopoulos and R. J. Williams</i>	134
Part II A method for approximating the optimal network <i>L. R. Esau and K. C. Williams</i>	142
Part III An analysis of a request-queued buffer pool <i>J. P. Bricault and I. Delgalvis</i>	148
Part IV An analysis of auxiliary storage activity <i>P. H. Seaman, R. A. Lind, and T. L. Wilson</i>	158
Part V A technique for estimating channel interference <i>T. W. Gay, Jr.</i>	171
Part VI The role of digital simulation <i>P. H. Seaman</i>	175

Number Four

A computer program for the statistical analysis of series of events <i>P. A. W. Lewis</i>	202
Merge-sort analysis by matrix techniques <i>C. E. Radke</i>	226
Kernel analysis of elliptic partial differential equations <i>S. G. Hahn and E. V. Hankam</i>	248

Number One

Function and design of DOS/360 and TOS/360 <i>G. Bender, D. N. Freeman, and J. D. Smith</i>	2
Data management concepts for DOS/360 and TOS/360 <i>A. R. Cenfetelli</i>	22
Internal data management techniques for DOS/360 <i>D. H. Ricour and V. Mei</i>	38
Real-time systems in perspective <i>J. D. Aron</i>	49

Number Two

An application-oriented multiprocessing system	
Part I Introduction <i>J. F. Keeley</i>	78
Part II Design characteristics of the 9020 system <i>G. R. Blakeney, L. F. Cudney, and C. R. Eickhorn</i>	80
Part III Control program features <i>J. A. Devereaux</i>	95
Part IV The operational error analysis program <i>D. C. Lancto and R. L. Rockefeller</i>	103
Part V The diagnostic monitor <i>R. Suda</i>	116
Part VI Programs for the intended application <i>F. K. Seward</i>	124

Number Three

Evaluation of redundancy in a parallel algorithm <i>G. S. Shedler and M. M. Lehman</i>	142
Aspects of the Gemini real-time operating system <i>J. H. Mueller</i>	150
High-speed calculation of the critical paths of large networks <i>M. Montalbano</i>	163
An automatic dictionary and the verification of machine-readable text <i>E. J. Galli and H. Yamada</i>	192

Number Four

Microprogram control for SYSTEM/360 <i>S. G. Tucker</i>	222
Two continuous system modeling programs <i>R. D. Brennan and M. Y. Silberberg</i>	242
Conventions for digital data communication link design <i>J. L. Eisenbies</i>	267
