

Number One

The application of formal logic to programs and programming <i>C. D. Allen</i>	2
FORTTRAN extended-precision library <i>H. Kuki and J. Ascoly</i>	39
Interactive scheduling system <i>A. C. Brewer</i>	62

Number Two

The formal description of programming languages <i>E. J. Neuhold</i>	86
Simulation of a model of paging system performance <i>G. S. Shedler and S. C. Yang</i>	113
An analysis of the machine interference model <i>A. E. Ferdinand</i>	129
A computer graphics system for block diagram problems <i>L. A. Belady, M. W. Blasgen, C. J. Evangelisti, and R. D. Tennison</i>	143

Volume 10
1971

Number Three

Program restructuring for virtual memory <i>D. J. Hatfield and J. Gerald</i>	168
Performance criteria and measurement for a time-sharing system <i>Y. Bard</i>	193
Real-time traffic flow optimization <i>B. C. Black and D. C. Gazis</i>	217
Programming for economic lot-sizes with precedences between items <i>S. Gorenstein</i>	232
A guided bibliography to sorting <i>H. Lorin</i>	244

Number Four

A large-scale interactive administrative system <i>J. H. Wimbrow</i>	260
Analysis of free-storage algorithms <i>B. H. Margolin, R. P. Parmelee, and M. Schatzoff</i>	283
Modeling for computer center planning <i>F. Hanssmann, W. Kistler, and H. Schulz</i>	305
