Welcome to Microsoft Windows

Microsoft Windows brings a dazzling new perspective to personal computing, complete with a new generation of applications that make you more productive.

This catalog presents a variety of exciting Windows products for office automation, desktop publishing, presentation graphics, program and system development, and network communications that are compatible with all current versions of Microsoft Windows.

To order these products, contact the individual vendors directly or see your local software dealer.

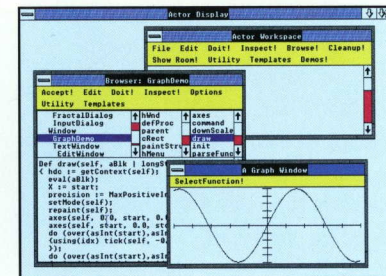

Actor

Write Windows programs fast

Once C was the ideal language for all PC programming. But for Windows programming, C is difficult, time consuming, and error prone. Now the ideal language is Actor®, the first interactive object-oriented language made for commercial development. It's the fastest, easiest way to write a windowing program.

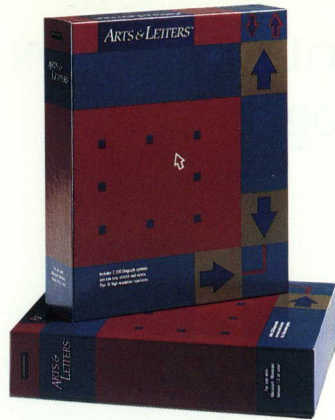

Actor provides built-in windowing classes you can customize to create standalone windowing applications. Its objects give you another layer of independence for a smooth transition to the OS/2 systems and Presentation Manager. And its powerful browsers, inspectors, and debuggers give you more insight into a windowing environment than C ever will. But your C will not be lost—C libraries can be linked to Actor, and its procedural syntax is easy for C programmers to learn.

Order directly from The Whitewater Group. Suggested retail price \$495. Academic price \$99. Academic site license \$99. Manuals for site license \$35. Language Extension I \$99. Shipping \$5 U.S., \$25 international.

Artwork without the work

Arts & Letters™ lets you create presentation-quality diagrams, illustrations, organization charts, signs, and other graphics with the skill of a professional artist. Unlike typical paint or freehand drawing programs, Arts & Letters gives you beautiful results—even if you can't draw a straight line!

Choose from over 2,200 professionally drawn clip-art images and 15 high-resolution typefaces. Thousands of optional images and logos are also available, and dozens of fancy typefaces. Or use the Graphics Editor to draw your own artwork, modify existing symbols, or trace scanned images. You can bend, twist, stretch, and rotate type and symbols without affecting image quality; produce presentation-quality output on any laser printer; and exchange text and graphics with other Windows applications.

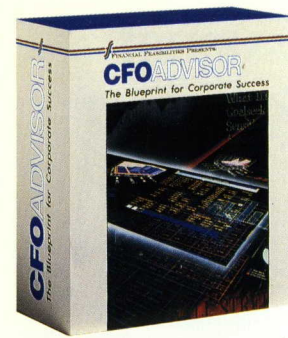

Arts & Letters supports a complete set of import and export capabilities, including TIFF, EPS, and ANSI standard CGM format.

Order today for a *free* publisher's type scale and coupon for five *free* typefaces. Retail for \$395.

Computer Support Corporation
15926 Midway Road
Dallas, TX 75244
(214) 661-8960

COMPUTER SUPPORT CORPORATION

Beyond the spreadsheet

CFO Advisor™ goes beyond the spreadsheet™ to give today's manager immediate solutions to business problems. This powerful decision-support system uses accounting data to analyze your company's current position, predict the impact of different strategies, and determine performance standards for achieving desired results. Its unique Blueprint™ screen identifies the interrelationships between the company's key performance areas, where management has direct control, and key result areas, which measure management efficiency and effectiveness and corporate returns.

CFO Advisor accepts your direct input, or it interfaces with high-end general ledger systems such as ACCPAC® PLUS, Solomon III®, RealWorld®, and CYMA®. It also interfaces with Lotus® 1-2-3® and SuperCalc®, and exchanges data *dynamically* with Microsoft Excel.

Order CFO Advisor directly from Financial Feasibilities, Inc. for \$995. Or try our Trial Pak first for only \$45, fully reimbursed with product purchase.

 A screenshot of the CFO Advisor software interface. The window title is 'CFO Advisor - Blueprint - company.cfo'. The interface shows a menu bar with 'File', 'Edit', 'Setup', 'Analysis', 'Display', 'Items', 'Graphs', 'Options', 'Tools', and 'Help'. The main area displays a complex financial blueprint with various data points and relationships.

ClickArt EPS Illustrations

Professional PostScript art

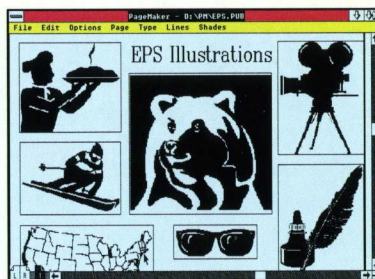

Picture this: computer art crisp and clear enough for even the most discriminating designers. Introducing ClickArt® EPS Illustrations, the new standard for high-quality computer art.

ClickArt EPS Illustrations is a collection of 180 Encapsulated PostScript® images created by professional artists. PostScript lets you resize EPS Illustrations to any dimension without loss of detail or sharpness. And the resolution of the images is limited only by the resolution of your PostScript printer.

EPS Illustrations is ideal for enhancing any publication that demands the highest-quality art. Image categories include animals, awards, business equipment, desk items, faces, food and drink, industrial symbols, maps, musical instruments, transportation, seasons, sports, and people. EPS Illustrations is compatible with PC PageMaker® 2.0 and other EPS-reading products.

ClickArt Scrapbook+

Graphics and text at a glance

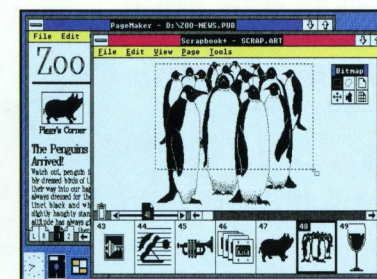

ClickArt Scrapbook+ is an intelligent graphics and text manager that gives you two ways to store and organize graphics and text—visually and by label. It lets you retrieve the image you want easily and immediately for pasting into PC PageMaker, Microsoft Windows Write, or any other Windows application.

ClickArt Scrapbook+ is easy to use and highly visual. It automatically creates miniature copies of your images and puts them into a file, where you can see a visual index of all your images at a glance. You can also attach a series of keywords to an image and use the lightning-fast Find function to retrieve images by name. And ClickArt Scrapbook+ contains many more timesaving features, such as Screen Capture and Auto-Paste.

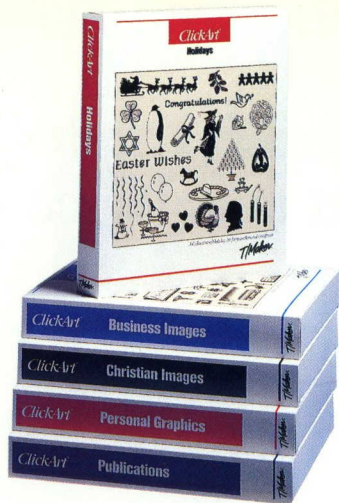

ClickArt Scrapbook+ lets you store and organize text files, Excel data (SYLK), Excel graphics, Encapsulated PostScript files, MetaFiles, and more! Requires Microsoft Windows 2.0 or higher.

For a full catalog, see your local software dealer or contact T/Maker. Retail for \$129.95.

ClickArt Series of Image Portfolios

#1 source of electronic art

ClickArt Business Images is an art portfolio of more than 1,000 business-oriented images, including presentation art, computers, office equipment, communications, arrows, logos, and more.

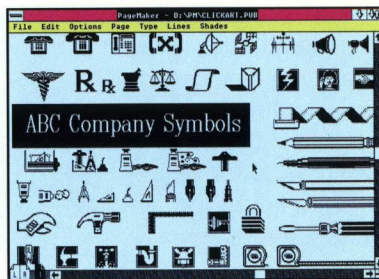

ClickArt Personal Graphics adds a personal touch to your printed materials with cars, celebrities, cartoons, animals, billboards, sports, statues, Americana, political figures, and more.

ClickArt Publications gives your publications a professional flair with borders, calendars, credit cards, alphabets, desk items, dingbats, headlines, maps, marquees, and more.

ClickArt Holidays enhances your invitations with Christmas, New Year, Hanukkah, and other holiday images, decorative borders, stars, and more.

ClickArt Christian Images includes crosses, biblical characters, and other symbols for Christian-oriented publications.

For a full catalog, see your local software dealer or contact T/Maker. Retailers for \$69.95/each.

Da Vinci eMAIL

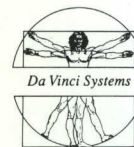

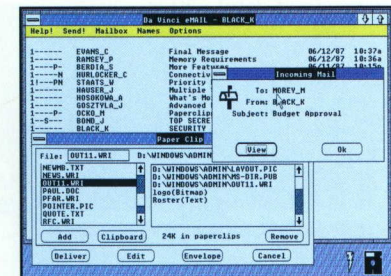

Electronic mail for Windows

Da Vinci eMAIL is the first electronic mail package written for Microsoft Windows—and LAN Magazine's product of the year. It lets you send messages, files, and the contents of the Windows clipboard to other users on a LAN; alerts you to incoming messages with a pop-up window, tone, or both; and gives you a hot key to create and send messages without taking eMAIL out of icon form. The message editor supports common Windows cut-and-paste functions and lets you load files from disk. Facilities to dial out to other networks, allow remote users to receive mail, and connect to MCI Mail®, All-In-One®, and IBM® Profs® will be available soon.

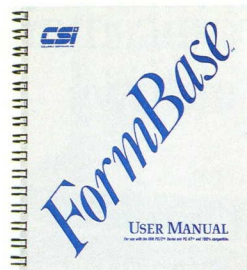

Da Vinci eMAIL takes advantage of NetBIOS when present but does not require it. Its modular network architecture supports DECNET®, UUCP, X.400, and other networks. Da Vinci eMAIL can act as a DDE agent, allowing DDE messages to be exchanged over a LAN.

Order directly from Da Vinci Systems. 6-user Starter Kit \$595.

FormBase

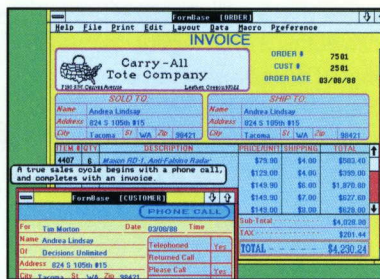

Powerful forms editor and DBMS

FormBase™ combines an easy-to-use forms editor with a powerful relational database manager. It draws even the most complex professional forms using the graphic capabilities of Microsoft Windows. Your forms can have sub-forms and tables with an unlimited number of rows. There is no limitation on number and size of fields and records. And no need to learn about data definition, screen definition, or report-generation languages. Forms are your only interface to the database.

You use forms to enter data and images, prepare reports, or make inquiries. You can modify forms easily, even during data entry. You can reorganize data automatically, link forms, and implement relational features such as join and lookup—simply by modifying a form's layout. And you can transfer forms (and data) within FormBase or to other applications, such as Excel, Lotus 1-2-3, dBASE®, and WordPerfect™.

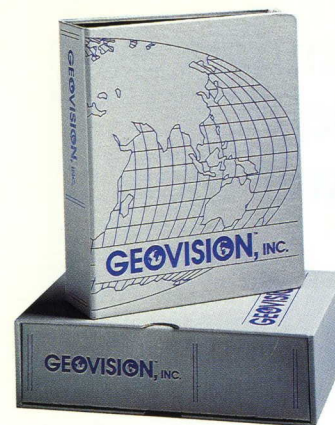

Order directly from Columbia Software, Inc.

GEOVISION Desktop Geographic Information System

The world on a platter

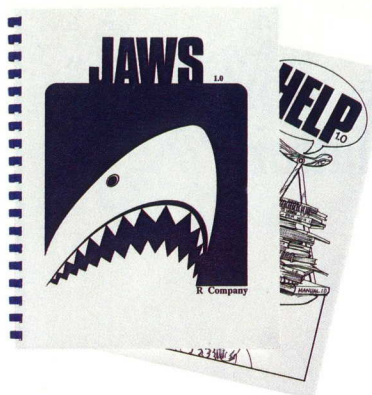

The GEOVISION™ Desktop Geographic Information System puts the powerful capabilities of mini- and mainframe-based mapping systems on your personal computer. GEOVISION's Windows/On the World application software and companion CD-ROM mapping database let you access, display, and manipulate large geographic databases and generate accurate map overlays for many applications. You also get the GEOdisc™ U.S. Atlas, a CD-ROM database containing a complete digital representation of the United States on a scale of 1:2,000,000. It includes major highways, waterways, political boundaries, railroads, federal land areas, and hydrological districts, plus a file of more than a million place and landmark names with their appropriate coordinates. You can display distance, bearing, and position; output maps to color hardcopy devices or other Windows applications; and cut and paste maps to other documents. This system has complete interactive vector graphics capability and links to external databases.

Order from your local dealer or directly from GEOVISION. Suggested retail price \$990.

Hammer & Vise

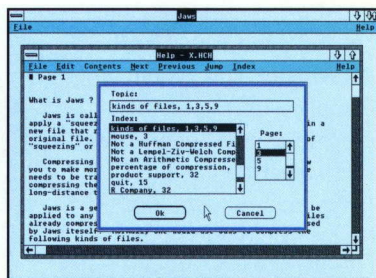

Hammer & Vise PC power tools

Save time and disk space with Hammer & Vise, two powerful utilities for on-line help and file compression.

The Hammer & Vise on-line help utility lets you create a help facility tailored to your specific needs and applications. Use it instead of creating your own embedded help facility and save hours of time and development effort. This on-line help utility runs with any Windows application, so you can work steadily at any task and get the help you need immediately. And it generates a table of contents or an index automatically.

The Hammer & Vise file-compression utility lets you save more information on any disk—you'll typically save 50% disk space after compression. This utility is an indispensable tool for people who use scanners, work with graphic images, maintain large data-bases, or transmit large files with modems.

Hammer & Vise is available on both 3½" and 5¼" disks. To order, contact R directly. Price \$49.95

hDC QuickStart

The applications organizer

hDC QuickStart™ is an intuitive graphic menuing system that lets you launch applications without searching through Windows MS-DOS® Executive file listings. You can organize applications, documents, spreadsheets, and other files into easily understood folders; design menus with your own color icons, descriptions, and help screens; set up passwords to protect confidential data; and access applications instantly with a single keystroke or mouse click. QuickStart can be customized to meet individual needs and corporate requirements for standardized Windows workstations, integrated multiple applications, and reduced training and implementation costs. QuickStart is compatible with all versions of Microsoft Windows, Hewlett-Packard® Windows, and all Windows applications, including Microsoft Excel, Micrografx Windows Draw™, and Aldus PageMaker. It also supports non-Windows applications such as Lotus 1-2-3, dBASE III Plus, and DOS batch files.

To order QuickStart, call hDC for your nearest dealer location. Suggested retail price \$79.95.

Inertia

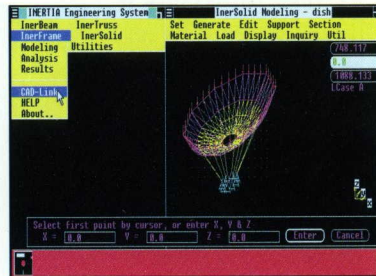

The engineering toolkit

INERTIA™ is a toolkit for creating and analyzing models in all areas of engineering. This multitasking engineering solution works similarly to most CAD systems. Its graphical input includes model geometry, supports, sections, materials, and loads. It does integrity checks on data. And it displays results in both text and images on screen and on Windows-compatible output devices. INERTIA results interface with AutoCAD®, VERSACAD®, and CADKEY®.

InerBeam, InerTruss, and Inerframe let you model, analyze, and design beams, trusses, and frames in 2D or 3D, and see stresses, reactions, member shear, moment of inertia, and failing members. InerSolid lets you examine several mechanical components simultaneously, including plates, shells, and solid objects.

And InerProp (not Windows-compatible) determines every engineering property for any shape. It takes user-defined, DXF, or IGES files.

Order from your dealer or directly from MCAE. Complete package \$2995. InerBeam \$495. InerProp \$495. InerTruss \$750. InerFrame \$1495. InerSolid \$1995.

Micrografx Designer

The cure for MacEnvy

For years PC users have been told they need a different type of computer to get superior graphics. And it's made them, well, green with MacEnvy. Until now.

Enter Micrografx Designer®.

Micrografx Designer turns your computer into a complete graphics studio. Nothing else comes close. Not on a PC. Not on a Mac.

Allow us to illustrate. You can draw anything. Trace over a scanned image. Fine-tune every line and curve. Rotate it. Duplicate it. Print it at high resolutions, from 300 to 2540 dpi. Micrografx Designer gives you the power to bring your ideas to life—from rough concept to finished art—all within one package.

So take a bite out of the idea that PCs can't do superior graphics, and get the cure for MacEnvy.

Order by mail or phone from Micrografx, Inc. Suggested retail price \$695.

Micrografx Graph Plus

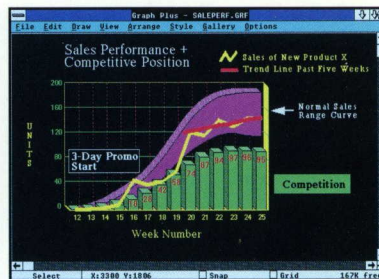

Discover uncharted territory

Micrografx Graph Plus™ takes computer graphing into previously uncharted territory. Now you get more drawing tools, graphs, and easy-to-use features than ever before. You can import data from most popular spreadsheet programs. Choose from a variety of charts. Add words and pictures. Combine any chart and graph. And enhance your work with free-form drawing. Graph Plus has the most powerful charting features available on any microcomputer today.

Graph Plus supports hundreds of printers and plotters, and many film recorders, too. And it's loaded with special features, including 3-dimensional projections, regression capabilities, and support for Dynamic Data Exchange. These enhancements make Graph Plus ideal for use with Microsoft Excel, Micrografx Designer, and other Windows applications. Graph Plus is the only business graph and chart package you will ever need.

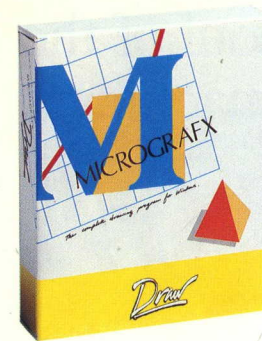

Order by mail or phone directly from Micrografx, Inc. Suggested retail price \$395.

Micrografx Windows Draw

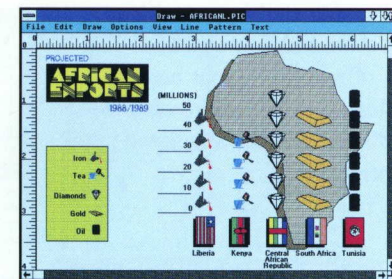

In a class by itself

Micrografx Windows Draw™ is designed for people who want to add basic drawings, flowcharts, and illustrations to their newsletters, forms, and publications. It's *the* best value in a basic drawing program.

Windows Draw lets you add dazzling graphics to any document by importing ready-to-use images from Micrografx ClipArt™. You can start with any of the hundreds of symbols available in each of the 20 ClipArt libraries. Modify them with lines and curves. Create shapes. Rotate and fill them with patterns and colors. Combine them to produce eye-catching original art. Then print your drawing on your choice of hundreds of supported printers and plotters. Windows Draw is easy to use and easy to learn.

Micrografx Windows Draw. In a class by itself.

Microsoft Excel

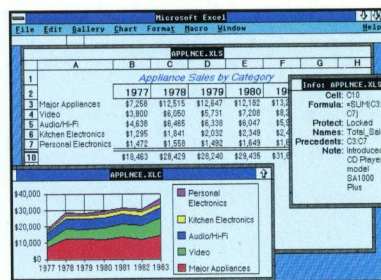

The soul of the new machines™

Microsoft® Excel combines a spreadsheet of unparalleled power with a lightning-fast database and the most outstanding business graphics ever built into a spreadsheet program. Now you can harness the full power of the new computers, high-resolution displays, and laser printers.

Display multiple worksheets and charts together, consolidate information, create summary reports, and link worksheets so when one changes, they all do. Use files and macros created in Lotus 1-2-3—the power of Microsoft Excel is meant to be shared. Make a daily report look like an annual report with typefaces, borders, and shading; create vivid charts with just one keystroke; and preview pages before you print, so when you finish, what you have in hand is exactly what you had in mind.

Microsoft Excel. A visible leap forward in spreadsheet power and convenience.

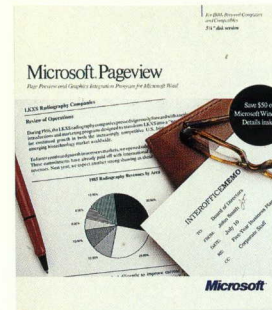

Order from your nearest dealer or call Microsoft at 800-426-9400. Suggested retail price \$495.

Microsoft®

Microsoft Pageview

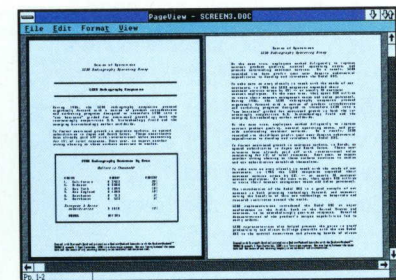

Look before you print!

Say goodbye to trial-run printouts. With Microsoft® Pageview, your first printout will be your last.

Pageview lets you preview your Microsoft Word version 4.0 documents and make changes—before you print. You can view a single page or two pages side by side, and see multiple columns, footnotes, and running heads. All formatting appears on screen exactly as it will look in print. And you can change margins and page breaks or reposition page numbers on the screen.

But that's not all. When used with Microsoft Windows 2.0 or Windows/386, Pageview lets you insert and work with graphics from programs like Microsoft Chart, Microsoft Excel, Microsoft Paintbrush®, Paint, and Lotus 1-2-3. You can move or change the size of graphic elements, preview them on screen, and print the entire graphic in your word processing document—all from within Pageview.

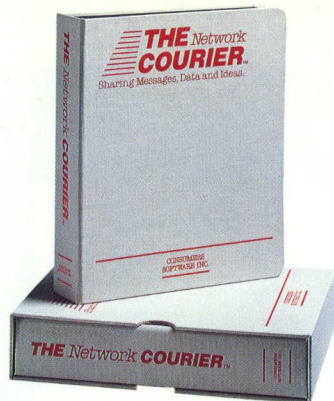

Order from your dealer or call Microsoft at 800-426-9400. Suggested retail price \$49.95

The Network Courier

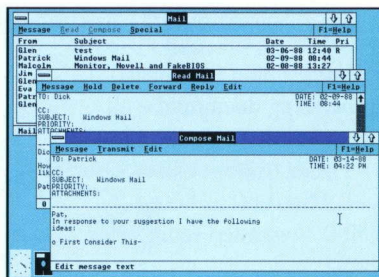

E-mail for LANs and beyond

The Network Courier® electronic mail system delivers in any environment, from a simple six-node office LAN to a fast-growing corporate-wide system. This truly flexible, interconnectable system knows no bounds.

We're committed to a standard that is hardware independent: Network Courier runs on Novell, 3-Com, IBM, Banyan, Western Digital, and other popular LAN systems, with or without NetBios, and you can choose between a character-based or Microsoft Windows user interface. (OS/2 will be supported later this year.) Using extended gateways, you can exchange mail with IBM's Profs, DEC's All-In-One and VAX® Mail, MCI Mail, and soon any X400 system. The Network Courier supports up to 150 users on a server.

To order, call our toll-free order line at (800) 663-8935. The Network Courier Windows Version is \$995 per server. Windows Mail User Agent, a companion product for character-based Network Courier, can be purchased separately for \$595.

NEXPERT OBJECT

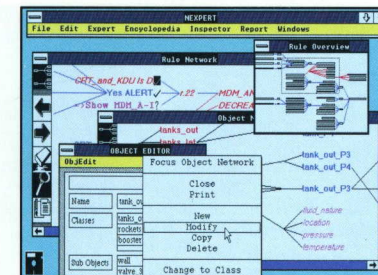

Expert system building tool

NEXPERT OBJECT™ provides a unique environment for developing and running expert systems in diagnostics, finance, simulation, planning, process control, and other applications. This hybrid rule- and object-based system runs on the IBM® PC/AT®, PS/2™, and 80386 machines under DOS with Microsoft Windows and the OS/2 systems and it is fully written in C to ensure a high level of performance and integration. It features integrated forward and backward chaining, automatic goal generation, pattern-matching and user-defined multiple inheritance. NEXPERT can be fully embedded within operational environments through the AI library.

NEXPERT's comprehensive graphic interface lets you edit rules and objects and build control structures. Its open, event-driven architecture lets you develop real-time on-line applications and supports full communication with standard databases. NEXPERT users include industry leaders such as IBM, DEC, GTE, and many others.

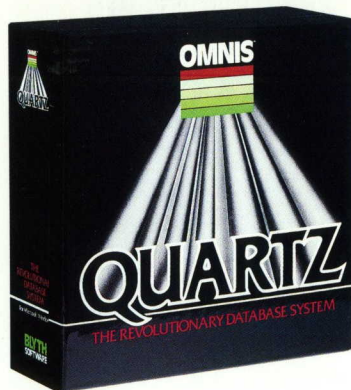

Order from Neuron Data, Inc. \$5000 for the development tool; \$400 for the run-time.

Omnis Quartz

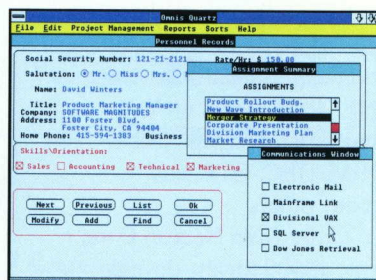

A revolutionary Windows DBMS

Omnis™ Quartz™ harnesses the optimal user interface of Microsoft Windows to a powerful and sophisticated multiuser database. The result is a new-generation platform for database design and operation.

Quartz combines user-sensitive features such as pull-down menus, pop-up windows, push buttons, and scroll lists with the latest in database and network technologies. Custom multiuser database design and management are significantly faster and easier with Quartz, making it the database of choice for Microsoft Windows workstations.

Quartz also bridges the gap between DOS and the OS/2 systems and Presentation Manager applications. Applications can be carried over with absolutely no changes to program or data and will have virtually the same look and feel.

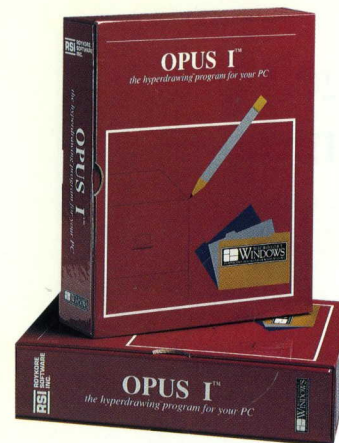

To order, see your local software dealer or call Blyth Software. Suggested retail price \$795.

Opus I

The hyperdrawing program

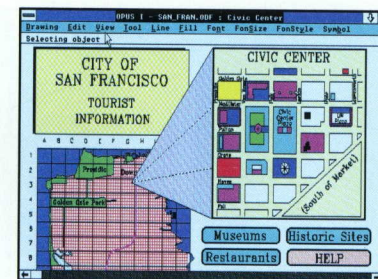

OPUS I™ is more than a graphics tool—it's a revolutionary concept in graphics software, with endless possibilities for creating, planning, managing, teaching, and more.

OPUS I gives you an array of powerful object-oriented drawing tools to create technical diagrams, maps, floor plans, and flow charts or to import scanned pictures. Its powerful file manager lets you store information about anything in your drawing.

But that's only the beginning. OPUS I's hyperdrawing™ feature lets you link related drawings and information and glide effortlessly from one screen to another, just by pointing and clicking. So you can view drawings and information the way that makes most sense to you.

Use OPUS I for your own business or as an authoring tool to create applications for others. Over 30,000 OPUS I licenses already sold.

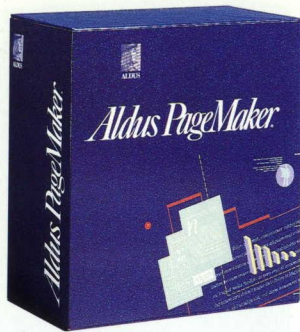

Call (800) 227-0847 for a free demo disk or to ask how OPUS I can meet your specific needs. List price \$395.

PageMaker

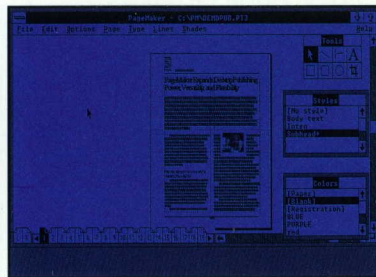

PageMaker is turning 3.0

Three years after inventing desktop publishing, the people at Aldus have done it again. Introducing PageMaker 3.0, a new version dedicated to one simple proposition: helping you produce the widest range of great-looking documents with the least amount of effort.

From the beginning, PageMaker has given you perfect control over every element of every page. Now it lets you assemble even the longest documents with a couple of mouse clicks. And import files from a wide range of word processing, database, spreadsheet, and graphics programs.

Altogether, we've added over 35 new features to PageMaker, including 20 predesigned page formats (or templates) and the best PostScript and HP® LaserJet® printer support in the industry.

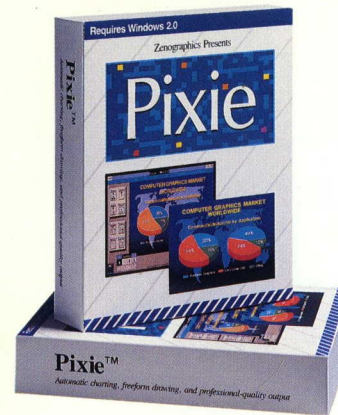

Call Aldus at (206) 628-2375 for the dealer nearest you. Suggested retail price U.S. \$795.

Seattle, WA 98104
(206) 622-5500

Pixie

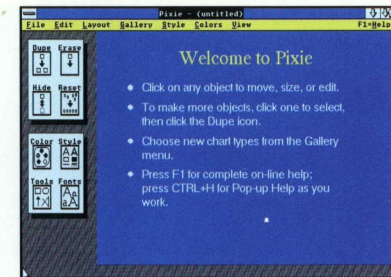

Business charts made easy

Pixie is the easiest business charting package available—it lets you create charts by *direct manipulation*. For example, instead of choosing “explode slice #3” from a menu for an exploded pie chart, you simply drag the slice out. To change the data in a bar chart, just drag the bar up or down. Pixie creates presentation-quality word charts, pie charts, and other common business charts. And Pixie’s full set of drawing tools (similar to those in Aldus PageMaker) lets you touch up your charts or create freehand drawings from scratch.

With Pixie, you can import named ranges and graphs from Lotus worksheets, and use the Windows clipboard to pull in Windows pictures, bitmaps, or text. You can even import image files from these non-Windows applications: industry-standard CGM, VideoShow™, and Zenographics Mirage image files. And you can export pictures you create with Pixie to CGM, Mirage, and Matrix cameras.

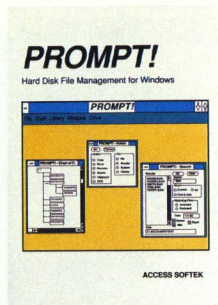

To order, call Zenographics for the dealer nearest you. Special introductory price \$195.

PROMPT!

The new hard disk manager

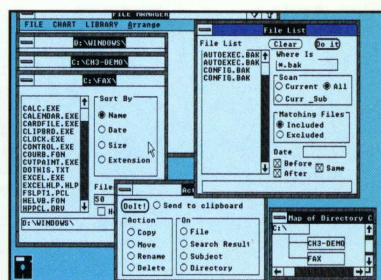

PROMPT! is the ultimate control center for managing your hard disk. Now you can do all your hard disk housekeeping without leaving Microsoft Windows. In one operation you can copy, move, rename, or delete one file or any number of files scattered all over your disk. PROMPT! organizes your files exactly the way you want.

PROMPT! finds files by name, extension, or date created. It will search your entire hard disk for individual files or for every file created before or after a specified date. PROMPT! displays a roadmap of your entire hard disk structure in a single window and lets you open other windows. So you can view the contents of any number of directories at the same time.

PROMPT! breaks through the limits of file organization under DOS. You can store lists of files the same way you do in directories —without tying up extra disk space.

Order PROMPT! from any computer dealer or directly from Access Softek. Only \$79.

Publisher's Type Foundry

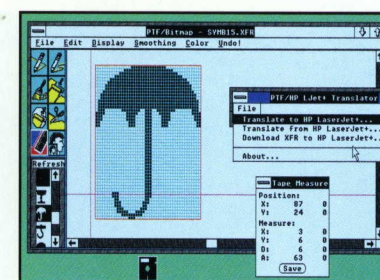

The infinite font cartridge

Create all the fonts and symbols you'll ever need with Publisher's Type Foundry™. Starting with either a typeface on paper or a soft font on-line, it's easy to build your own device-independent family of fonts in different sizes, with bold, italic, extended, and condensed variations. You load a scanned typeface or logo, customize it, generate a full range of sizes, and download the new fonts or logos to your printer. You can also convert soft fonts purchased for one printer to another printer.

Publisher's Type Foundry lets you create custom fonts, logos, and symbol libraries with virtually unlimited freedom. And use them in a variety of applications, including all ZSoft Paintbrush products, Ventura Publisher™, PC PageMaker, and on printers compatible with PostScript or the HP LaserJet+.

To order, see your dealer or contact ZSoft. Suggested retail price \$495. VHS demonstration video available for \$7.95, refundable with product purchase.

Z·SOFT

ReadySetGo

ReadySetGo 4.0 for the PC

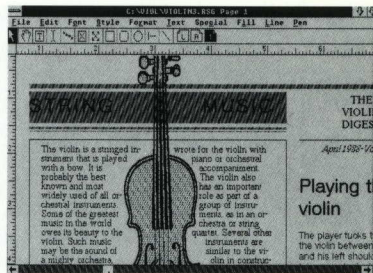

For the first time, ReadySetGo™ 4.0 brings power production features to PC desktop publishing. This preeminent desktop publishing software for Macintosh® computers is now available for the DOS/Windows environment.

ReadySetGo provides style sheets and automatic text flow so the desktop publisher can produce long, structured documents quickly and easily. ReadySetGo gives the newsletter publisher fine typographic controls and professional design tools with sophisticated options, such as wrapping text around irregular graphics. And ReadySetGo's unique spelling checker is a timesaver in any document-production environment.

ReadySetGo. The desktop publishing software that works the hardest, now works on the PC.

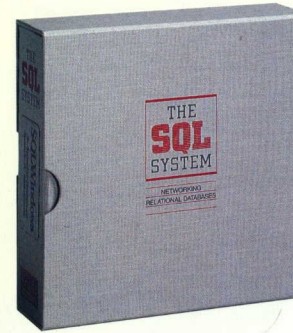

To order, call Manhattan Graphics. List price \$695.

SQL Windows

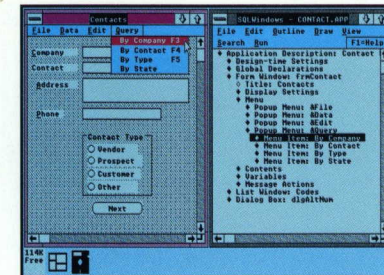

Applications in less time

SQLWindows™ gives you a powerful application-development system and fourth-generation language for PC workstations. It does not require C programming, so it's easier to use than the Windows Toolkit and lets you deliver production-quality Windows applications in less time.

SQLWindows tightly couples the elegant Windows user interface with the data-access capabilities of the SQL language—but not with a specific SQL back end. So applications you develop with SQLWindows can access many different SQL servers transparently. You can also develop standalone Windows applications without any SQL DBMS. SQLWindows supports Gupta's SQLBase® Server, the Lotus/DBMS Server, IBM's DB2 on host mainframes, and more to come. It requires Windows 2.0 or Windows/386 on each workstation.

Order SQLWindows directly from Gupta Technologies for \$595/workstation. Runtime versions start at \$150/workstation. (Database server not included.) Special single-workstation development package (with SQLBase) is \$1295/workstation.
