**RAM**®

POTTER RANDOM ACCESS MEMORY

# ...a completely new concept in random access memory

**TWICE AS FAST**

**DOUBLE THE CAPACITY**

**COMPLETE  
DATA SECURITY**

**LOWEST PRICED UNIT  
AVAILABLE TODAY**

A random access memory unit that costs *less* than competitive equipment is news in itself. But when you add to it doubled bit capacity, immediate check-read-after-write capability, and complete data security, you begin to realize what new — *new from Potter* — really means.

The RAM\* is a fast access, infinitely-expandable cartridge-loaded memory device. Its revolutionary new drive system permits using high density magnetic tape loops in random access memory applications for the first time. Still another revolutionary development — a read-after-write head — permits a complete write and check read operation in less than 90 milliseconds. The fastest available!

Potter's unique Tape Pack cartridge is another feature that really sets the RAM apart. Tape Pack cartridges need no more special handling consideration than a brief case. Even if a cartridge is accidentally dropped to the floor, data remains secure. And because critically fabricated disks are eliminated, Tape Packs are less than half the cost of disk packs.

But these are just the highlights of this remarkable breakthrough in random access memory equipment. Get the full details on the new Potter RAM for yourself. Write or wire Potter today.

**FLEXIBLE  
TAPE LOOP  
STORAGE  
MEDIUM**

tape loops float over stationary bearings on cushions of air... "fly" past write/read head without making physical contact. Years of trouble-free operation are assured.

**UNIQUE  
TAPE PACK  
CARTRIDGES**

rugged plexiglass and aluminum cartridges protect tape during both storage and operation. Dirt, dust and contamination are sealed out.

**POTTER**

**INSTRUMENT CO., INC.**

\*Registered trademark of Potter Instrument Company, Inc.

**SIMPLE CONSTRUCTION**

rugged "whiffletree" binary head positioning mechanism combines simplicity with precision . . . eliminates complex servo mechanisms.

**MINIMUM MOVING PARTS**

single write/read head post assembly is positioned by simple linear movement.

**EASY TO OPERATE — INFINITE CAPACITY**

operator selects proper Tape Pack

latches Tape Pack into RAM

touches start button

loading operation is completed automatically. RAM capacity is infinitely expandable. Each cartridge adds 50 million bits of memory.

**SUMMARY SPECIFICATIONS**

Cartridge Capacity . . . . .	50.3 million bits
Average Head Positioning Time . . . . .	62.5 ms
Average Latency Time . . . . .	25.0 ms
Average Access Time . . . . .	87.5 ms
Check Read Delay . . . . .	1.7 ms
Check Read-After-Write Cycle Time . . . . .	89.2 ms
Data Transfer Rate (Bits) . . . . .	600 kc/s
